SFRS(I) 15 Revenue from Contracts with Customers Illustrative Examples

These examples accompany, but are not part of, SFRS(I) 15. They illustrate aspects of SFRS(I) 15 but are not intended to provide interpretative guidance.

IE1 These examples portray hypothetical situations illustrating how an entity might apply some of the requirements in SFRS(I) 15 to particular aspects of a contract with a customer on the basis of the limited facts presented. The analysis in each example is not intended to represent the only manner in which the requirements could be applied, nor are the examples intended to apply only to the specific industry illustrated. Although some aspects of the examples may be present in actual fact patterns, all relevant facts and circumstances of a particular fact pattern would need to be evaluated when applying SFRS(I) 15.

Identifying the contract

IE2 Examples 1–4 illustrate the requirements in paragraphs 9–16 of SFRS(I) 15 on identifying the contract. In addition, the following requirements are illustrated in these examples:

- (a) the interaction of paragraph 9 of SFRS(I) 15 with paragraphs 47 and 52 of SFRS(I) 15 on estimating variable consideration (Examples 2–3); and
- (b) paragraph B63 of SFRS(I) 15 on consideration in the form of sales-based or usage-based royalties on licences of intellectual property (Example 4).

Example 1—Collectability of the consideration

IE3 An entity, a real estate developer, enters into a contract with a customer for the sale of a building for CU1 million.¹ The customer intends to open a restaurant in the building. The building is located in an area where new restaurants face high levels of competition and the customer has little experience in the restaurant industry.

IE4 The customer pays a non-refundable deposit of CU50,000 at inception of the contract and enters into a long-term financing agreement with the entity for the remaining 95 per cent of the promised consideration. The financing arrangement is provided on a non-recourse basis, which means that if the customer defaults, the entity can repossess the building, but cannot seek further compensation from the customer, even if the collateral does not cover the full value of the amount owed. The entity's cost of the building is CU600,000. The customer obtains control of the building at contract inception.

IE5 In assessing whether the contract meets the criteria in paragraph 9 of SFRS(I) 15, the entity concludes that the criterion in paragraph 9(e) of SFRS(I) 15 is not met because it is not probable that the entity will collect the consideration to which it is entitled in exchange for the transfer of the building. In reaching this conclusion, the entity observes that the customer's ability and intention to pay may be in doubt because of the following factors:

- (a) the customer intends to repay the loan (which has a significant balance) primarily from income derived from its restaurant business (which is a business facing significant risks because of high competition in the industry and the customer's limited experience);
- (b) the customer lacks other income or assets that could be used to repay the loan; and
- (c) the customer's liability under the loan is limited because the loan is non-recourse.

¹ In these examples monetary amounts are denominated in 'currency units' (CU).

- IE6 Because the criteria in paragraph 9 of SFRS(I) 15 are not met, the entity applies paragraphs 15–16 of SFRS(I) 15 to determine the accounting for the non-refundable deposit of CU50,000. The entity observes that none of the events described in paragraph 15 have occurred—that is, the entity has not received substantially all of the consideration and it has not terminated the contract. Consequently, in accordance with paragraph 16, the entity accounts for the non-refundable CU50,000 payment as a deposit liability. The entity continues to account for the initial deposit, as well as any future payments of principal and interest, as a deposit liability, until such time that the entity concludes that the criteria in paragraph 9 are met (ie the entity is able to conclude that it is probable that the entity will collect the consideration) or one of the events in paragraph 15 has occurred. The entity continues to assess the contract in accordance with paragraph 14 to determine whether the criteria in paragraph 9 are subsequently met or whether the events in paragraph 15 of SFRS(I) 15 have occurred.

Example 2—Consideration is not the stated price—implicit price concession

- IE7 An entity sells 1,000 units of a prescription drug to a customer for promised consideration of CU1 million. This is the entity's first sale to a customer in a new region, which is experiencing significant economic difficulty. Thus, the entity expects that it will not be able to collect from the customer the full amount of the promised consideration. Despite the possibility of not collecting the full amount, the entity expects the region's economy to recover over the next two to three years and determines that a relationship with the customer could help it to forge relationships with other potential customers in the region.
- IE8 When assessing whether the criterion in paragraph 9(e) of SFRS(I) 15 is met, the entity also considers paragraphs 47 and 52(b) of SFRS(I) 15. Based on the assessment of the facts and circumstances, the entity determines that it expects to provide a price concession and accept a lower amount of consideration from the customer. Accordingly, the entity concludes that the transaction price is not CU1 million and, therefore, the promised consideration is variable. The entity estimates the variable consideration and determines that it expects to be entitled to CU400,000.
- IE9 The entity considers the customer's ability and intention to pay the consideration and concludes that even though the region is experiencing economic difficulty, it is probable that it will collect CU400,000 from the customer. Consequently, the entity concludes that the criterion in paragraph 9(e) of SFRS(I) 15 is met based on an estimate of variable consideration of CU400,000. In addition, on the basis of an evaluation of the contract terms and other facts and circumstances, the entity concludes that the other criteria in paragraph 9 of SFRS(I) 15 are also met. Consequently, the entity accounts for the contract with the customer in accordance with the requirements in SFRS(I) 15.

Example 3—Implicit price concession

- IE10 An entity, a hospital, provides medical services to an uninsured patient in the emergency room. The entity has not previously provided medical services to this patient but is required by law to provide medical services to all emergency room patients. Because of the patient's condition upon arrival at the hospital, the entity provides the services immediately and, therefore, before the entity can determine whether the patient is committed to perform its obligations under the contract in exchange for the medical services provided. Consequently, the contract does not meet the criteria in paragraph 9 of SFRS(I) 15 and, in accordance with paragraph 14 of SFRS(I) 15, the entity will continue to assess its conclusion based on updated facts and circumstances.
- IE11 After providing services, the entity obtains additional information about the patient including a review of the services provided, standard rates for such services and the patient's ability and intention to pay the entity for the services provided. During the review, the entity notes its standard rate for the services provided in the emergency room is CU10,000. The entity also reviews the patient's information and to be consistent with its policies designates the patient

to a customer class based on the entity's assessment of the patient's ability and intention to pay.

- IE12 Before reassessing whether the criteria in paragraph 9 of SFRS(I) 15 have been met, the entity considers paragraphs 47 and 52(b) of SFRS(I) 15. Although the standard rate for the services is CU10,000 (which may be the amount invoiced to the patient), the entity expects to accept a lower amount of consideration in exchange for the services. Accordingly, the entity concludes that the transaction price is not CU10,000 and, therefore, the promised consideration is variable. The entity reviews its historical cash collections from this customer class and other relevant information about the patient. The entity estimates the variable consideration and determines that it expects to be entitled to CU1,000.
- IE13 In accordance with paragraph 9(e) of SFRS(I) 15, the entity evaluates the patient's ability and intention to pay (ie the credit risk of the patient). On the basis of its collection history from patients in this customer class, the entity concludes it is probable that the entity will collect CU1,000 (which is the estimate of variable consideration). In addition, on the basis of an assessment of the contract terms and other facts and circumstances, the entity concludes that the other criteria in paragraph 9 of SFRS(I) 15 are also met. Consequently, the entity accounts for the contract with the patient in accordance with the requirements in SFRS(I) 15.

Example 4—Reassessing the criteria for identifying a contract

- IE14 An entity licences a patent to a customer in exchange for a usage-based royalty. At contract inception, the contract meets all the criteria in paragraph 9 of SFRS(I) 15 and the entity accounts for the contract with the customer in accordance with the requirements in SFRS(I) 15. The entity recognises revenue when the customer's subsequent usage occurs in accordance with paragraph B63 of SFRS(I) 15.
- IE15 Throughout the first year of the contract, the customer provides quarterly reports of usage and pays within the agreed-upon period.
- IE16 During the second year of the contract, the customer continues to use the entity's patent, but the customer's financial condition declines. The customer's current access to credit and available cash on hand are limited. The entity continues to recognise revenue on the basis of the customer's usage throughout the second year. The customer pays the first quarter's royalties but makes nominal payments for the usage of the patent in Quarters 2–4. The entity accounts for any impairment of the existing receivable in accordance with SFRS(I) 9 *Financial Instruments*.
- IE17 During the third year of the contract, the customer continues to use the entity's patent. However, the entity learns that the customer has lost access to credit and its major customers and thus the customer's ability to pay significantly deteriorates. The entity therefore concludes that it is unlikely that the customer will be able to make any further royalty payments for ongoing usage of the entity's patent. As a result of this significant change in facts and circumstances, in accordance with paragraph 13 of SFRS(I) 15, the entity reassesses the criteria in paragraph 9 of SFRS(I) 15 and determines that they are not met because it is no longer probable that the entity will collect the consideration to which it will be entitled. Accordingly, the entity does not recognise any further revenue associated with the customer's future usage of its patent. The entity accounts for any impairment of the existing receivable in accordance with SFRS(I) 9 *Financial Instruments*.

Contract modifications

- IE18 Examples 5–9 illustrate the requirements in paragraphs 18–21 of SFRS(I) 15 on contract modifications. In addition, the following requirements are illustrated in these examples:
- (a) paragraphs 22–30 of SFRS(I) 15 on identifying performance obligations (Examples 7–8);

- (b) paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration (Examples 6 and 8–9); and
- (c) paragraphs 87–90 of SFRS(I) 15 on changes in the transaction price (Example 6).

Example 5—Modification of a contract for goods

IE19 An entity promises to sell 120 products to a customer for CU12,000 (CU100 per product). The products are transferred to the customer over a six-month period. The entity transfers control of each product at a point in time. After the entity has transferred control of 60 products to the customer, the contract is modified to require the delivery of an additional 30 products (a total of 150 identical products) to the customer. The additional 30 products were not included in the initial contract.

Case A—Additional products for a price that reflects the stand-alone selling price

IE20 When the contract is modified, the price of the contract modification for the additional 30 products is an additional CU2,850 or CU95 per product. The pricing for the additional products reflects the stand-alone selling price of the products at the time of the contract modification and the additional products are distinct (in accordance with paragraph 27 of SFRS(I) 15) from the original products.

IE21 In accordance with paragraph 20 of SFRS(I) 15, the contract modification for the additional 30 products is, in effect, a new and separate contract for future products that does not affect the accounting for the existing contract. The entity recognises revenue of CU100 per product for the 120 products in the original contract and CU95 per product for the 30 products in the new contract.

Case B—Additional products for a price that does not reflect the stand-alone selling price

IE22 During the process of negotiating the purchase of an additional 30 products, the parties initially agree on a price of CU80 per product. However, the customer discovers that the initial 60 products transferred to the customer contained minor defects that were unique to those delivered products. The entity promises a partial credit of CU15 per product to compensate the customer for the poor quality of those products. The entity and the customer agree to incorporate the credit of CU900 (CU15 credit × 60 products) into the price that the entity charges for the additional 30 products. Consequently, the contract modification specifies that the price of the additional 30 products is CU1,500 or CU50 per product. That price comprises the agreed-upon price for the additional 30 products of CU2,400, or CU80 per product, less the credit of CU900.

IE23 At the time of modification, the entity recognises the CU900 as a reduction of the transaction price and, therefore, as a reduction of revenue for the initial 60 products transferred. In accounting for the sale of the additional 30 products, the entity determines that the negotiated price of CU80 per product does not reflect the stand-alone selling price of the additional products. Consequently, the contract modification does not meet the conditions in paragraph 20 of SFRS(I) 15 to be accounted for as a separate contract. Because the remaining products to be delivered are distinct from those already transferred, the entity applies the requirements in paragraph 21(a) of SFRS(I) 15 and accounts for the modification as a termination of the original contract and the creation of a new contract.

IE24 Consequently, the amount recognised as revenue for each of the remaining products is a blended price of CU93.33 $\{[(CU100 \times 60 \text{ products not yet transferred under the original contract}) + (CU80 \times 30 \text{ products to be transferred under the contract modification})] \div 90 \text{ remaining products}\}$.

Example 6—Change in the transaction price after a contract modification

- IE25 On 1 July 20X0, an entity promises to transfer two distinct products to a customer. Product X transfers to the customer at contract inception and Product Y transfers on 31 March 20X1. The consideration promised by the customer includes fixed consideration of CU1,000 and variable consideration that is estimated to be CU200. The entity includes its estimate of variable consideration in the transaction price because it concludes that it is highly probable that a significant reversal in cumulative revenue recognised will not occur when the uncertainty is resolved.
- IE26 The transaction price of CU1,200 is allocated equally to the performance obligation for Product X and the performance obligation for Product Y. This is because both products have the same stand-alone selling prices and the variable consideration does not meet the criteria in paragraph 85 that requires allocation of the variable consideration to one but not both of the performance obligations.
- IE27 When Product X transfers to the customer at contract inception, the entity recognises revenue of CU600.
- IE28 On 30 November 20X0, the scope of the contract is modified to include the promise to transfer Product Z (in addition to the undelivered Product Y) to the customer on 30 June 20X1 and the price of the contract is increased by CU300 (fixed consideration), which does not represent the stand-alone selling price of Product Z. The stand-alone selling price of Product Z is the same as the stand-alone selling prices of Products X and Y.
- IE29 The entity accounts for the modification as if it were the termination of the existing contract and the creation of a new contract. This is because the remaining Products Y and Z are distinct from Product X, which had transferred to the customer before the modification, and the promised consideration for the additional Product Z does not represent its stand-alone selling price. Consequently, in accordance with paragraph 21(a) of SFRS(I) 15, the consideration to be allocated to the remaining performance obligations comprises the consideration that had been allocated to the performance obligation for Product Y (which is measured at an allocated transaction price amount of CU600) and the consideration promised in the modification (fixed consideration of CU300). The transaction price for the modified contract is CU900 and that amount is allocated equally to the performance obligation for Product Y and the performance obligation for Product Z (ie CU450 is allocated to each performance obligation).
- IE30 After the modification but before the delivery of Products Y and Z, the entity revises its estimate of the amount of variable consideration to which it expects to be entitled to CU240 (rather than the previous estimate of CU200). The entity concludes that the change in estimate of the variable consideration can be included in the transaction price, because it is highly probable that a significant reversal in cumulative revenue recognised will not occur when the uncertainty is resolved. Even though the modification was accounted for as if it were the termination of the existing contract and the creation of a new contract in accordance with paragraph 21(a) of SFRS(I) 15, the increase in the transaction price of CU40 is attributable to variable consideration promised before the modification. Therefore, in accordance with paragraph 90 of SFRS(I) 15, the change in the transaction price is allocated to the performance obligations for Product X and Product Y on the same basis as at contract inception. Consequently, the entity recognises revenue of CU20 for Product X in the period in which the change in the transaction price occurs. Because Product Y had not transferred to the customer before the contract modification, the change in the transaction price that is attributable to Product Y is allocated to the remaining performance obligations at the time of the contract modification. This is consistent with the accounting that would have been required by paragraph 21(a) of SFRS(I) 15 if that amount of variable consideration had been estimated and included in the transaction price at the time of the contract modification.

- IE31 The entity also allocates the CU20 increase in the transaction price for the modified contract equally to the performance obligations for Product Y and Product Z. This is because the products have the same stand-alone selling prices and the variable consideration does not meet the criteria in paragraph 85 that require allocation of the variable consideration to one but not both of the performance obligations. Consequently, the amount of the transaction price allocated to the performance obligations for Product Y and Product Z increases by CU10 to CU460 each.
- IE32 On 31 March 20X1, Product Y is transferred to the customer and the entity recognises revenue of CU460. On 30 June 20X1, Product Z is transferred to the customer and the entity recognises revenue of CU460.

Example 7—Modification of a services contract

- IE33 An entity enters into a three-year contract to clean a customer's offices on a weekly basis. The customer promises to pay CU100,000 per year. The stand-alone selling price of the services at contract inception is CU100,000 per year. The entity recognises revenue of CU100,000 per year during the first two years of providing services. At the end of the second year, the contract is modified and the fee for the third year is reduced to CU80,000. In addition, the customer agrees to extend the contract for three additional years for consideration of CU200,000 payable in three equal annual instalments of CU66,667 at the beginning of years 4, 5 and 6. After the modification, the contract has four years remaining in exchange for total consideration of CU280,000. The stand-alone selling price of the services at the beginning of the third year is CU80,000 per year. The entity's stand-alone selling price at the beginning of the third year, multiplied by the remaining number of years to provide services, is deemed to be an appropriate estimate of the stand-alone selling price of the multi-year contract (ie the stand-alone selling price is 4 years × CU80,000 per year = CU320,000).
- IE34 At contract inception, the entity assesses that each week of cleaning service is distinct in accordance with paragraph 27 of SFRS(I) 15. Notwithstanding that each week of cleaning service is distinct, the entity accounts for the cleaning contract as a single performance obligation in accordance with paragraph 22(b) of SFRS(I) 15. This is because the weekly cleaning services are a series of distinct services that are substantially the same and have the same pattern of transfer to the customer (the services transfer to the customer over time and use the same method to measure progress—that is, a time-based measure of progress).
- IE35 At the date of the modification, the entity assesses the remaining services to be provided and concludes that they are distinct. However, the amount of remaining consideration to be paid (CU280,000) does not reflect the stand-alone selling price of the services to be provided (CU320,000).
- IE36 Consequently, the entity accounts for the modification in accordance with paragraph 21(a) of SFRS(I) 15 as a termination of the original contract and the creation of a new contract with consideration of CU280,000 for four years of cleaning service. The entity recognises revenue of CU70,000 per year ($CU280,000 \div 4$ years) as the services are provided over the remaining four years.

Example 8—Modification resulting in a cumulative catch-up adjustment to revenue

- IE37 An entity, a construction company, enters into a contract to construct a commercial building for a customer on customer-owned land for promised consideration of CU1 million and a bonus of CU200,000 if the building is completed within 24 months. The entity accounts for the promised bundle of goods and services as a single performance obligation satisfied over time in accordance with paragraph 35(b) of SFRS(I) 15 because the customer controls the building during construction. At the inception of the contract, the entity expects the following:

SFRS(I) 15 IE

CU

Transaction price	1,000,000
Expected costs	<u>700,000</u>
Expected profit (30%)	<u><u>300,000</u></u>

IE38 At contract inception, the entity excludes the CU200,000 bonus from the transaction price because it cannot conclude that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Completion of the building is highly susceptible to factors outside the entity's influence, including weather and regulatory approvals. In addition, the entity has limited experience with similar types of contracts.

IE39 The entity determines that the input measure, on the basis of costs incurred, provides an appropriate measure of progress towards complete satisfaction of the performance obligation. By the end of the first year, the entity has satisfied 60 per cent of its performance obligation on the basis of costs incurred to date (CU420,000) relative to total expected costs (CU700,000). The entity reassesses the variable consideration and concludes that the amount is still constrained in accordance with paragraphs 56–58 of SFRS(I) 15. Consequently, the cumulative revenue and costs recognised for the first year are as follows:

CU

Revenue	600,000
Costs	<u>420,000</u>
Gross profit	<u><u>180,000</u></u>

IE40 In the first quarter of the second year, the parties to the contract agree to modify the contract by changing the floor plan of the building. As a result, the fixed consideration and expected costs increase by CU150,000 and CU120,000, respectively. Total potential consideration after the modification is CU1,350,000 (CU1,150,000 fixed consideration + CU200,000 completion bonus). In addition, the allowable time for achieving the CU200,000 bonus is extended by 6 months to 30 months from the original contract inception date. At the date of the modification, on the basis of its experience and the remaining work to be performed, which is primarily inside the building and not subject to weather conditions, the entity concludes that it is highly probable that including the bonus in the transaction price will not result in a significant reversal in the amount of cumulative revenue recognised in accordance with paragraph 56 of SFRS(I) 15 and includes the CU200,000 in the transaction price. In assessing the contract modification, the entity evaluates paragraph 27(b) of SFRS(I) 15 and concludes (on the basis of the factors in paragraph 29 of SFRS(I) 15) that the remaining goods and services to be provided using the modified contract are not distinct from the goods and services transferred on or before the date of contract modification; that is, the contract remains a single performance obligation.

IE41 Consequently, the entity accounts for the contract modification as if it were part of the original contract (in accordance with paragraph 21(b) of SFRS(I) 15). The entity updates its measure of progress and estimates that it has satisfied 51.2 per cent of its performance obligation (CU420,000 actual costs incurred ÷ CU820,000 total expected costs). The entity recognises additional revenue of CU91,200 [(51.2 per cent complete × CU1,350,000 modified transaction price) – CU600,000 revenue recognised to date] at the date of the modification as a cumulative catch-up adjustment.

Example 9—Unapproved change in scope and price

IE42 An entity enters into a contract with a customer to construct a building on customer-owned land. The contract states that the customer will provide the entity with access to the land within 30 days of contract inception. However, the entity was not provided access until 120 days after contract inception because of storm damage to the site that occurred after contract

inception. The contract specifically identifies any delay (including force majeure) in the entity's access to customer-owned land as an event that entitles the entity to compensation that is equal to actual costs incurred as a direct result of the delay. The entity is able to demonstrate that the specific direct costs were incurred as a result of the delay in accordance with the terms of the contract and prepares a claim. The customer initially disagreed with the entity's claim.

- IE43 The entity assesses the legal basis of the claim and determines, on the basis of the underlying contractual terms, that it has enforceable rights. Consequently, it accounts for the claim as a contract modification in accordance with paragraphs 18–21 of SFRS(I) 15. The modification does not result in any additional goods and services being provided to the customer. In addition, all of the remaining goods and services after the modification are not distinct and form part of a single performance obligation. Consequently, the entity accounts for the modification in accordance with paragraph 21(b) of SFRS(I) 15 by updating the transaction price and the measure of progress towards complete satisfaction of the performance obligation. The entity considers the constraint on estimates of variable consideration in paragraphs 56–58 of SFRS(I) 15 when estimating the transaction price.

Identifying performance obligations

- IE44 Examples 10–12 illustrate the requirements in paragraphs 22–30 of SFRS(I) 15 on identifying performance obligations.

Example 10—Goods and services are not distinct

Case A—Significant integration service

- IE45 An entity, a contractor, enters into a contract to build a hospital for a customer. The entity is responsible for the overall management of the project and identifies various promised goods and services, including engineering, site clearance, foundation, procurement, construction of the structure, piping and wiring, installation of equipment and finishing.
- IE46 The promised goods and services are capable of being distinct in accordance with paragraph 27(a) of SFRS(I) 15. That is, the customer can benefit from the goods and services either on their own or together with other readily available resources. This is evidenced by the fact that the entity, or competitors of the entity, regularly sells many of these goods and services separately to other customers. In addition, the customer could generate economic benefit from the individual goods and services by using, consuming, selling or holding those goods or services.
- IE47 However, the promises to transfer the goods and services are not separately identifiable in accordance with paragraph 27(b) of SFRS(I) 15 (on the basis of the factors in paragraph 29 of SFRS(I) 15). This is evidenced by the fact that the entity provides a significant service of integrating the goods and services (the inputs) into the hospital (the combined output) for which the customer has contracted.
- IE48 Because both criteria in paragraph 27 of SFRS(I) 15 are not met, the goods and services are not distinct. The entity accounts for all of the goods and services in the contract as a single performance obligation.

Case B—Significant integration service

- IE48A An entity enters into a contract with a customer that will result in the delivery of multiple units of a highly complex, specialised device. The terms of the contract require the entity to establish a manufacturing process in order to produce the contracted units. The specifications are unique to the customer, based on a custom design that is owned by the customer and that were developed under the terms of a separate contract that is not part of the current negotiated exchange. The entity is responsible for the overall management of the contract, which requires the performance and integration of various activities including

procurement of materials, identifying and managing subcontractors, and performing manufacturing, assembly and testing.

- IE48B The entity assesses the promises in the contract and determines that each of the promised devices is capable of being distinct in accordance with paragraph 27(a) of SFRS(I) 15 because the customer can benefit from each device on its own. This is because each unit can function independently of the other units.
- IE48C The entity observes that the nature of its promise is to establish and provide a service of producing the full complement of devices for which the customer has contracted in accordance with the customer's specifications. The entity considers that it is responsible for overall management of the contract and for providing a significant service of integrating various goods and services (the inputs) into its overall service and the resulting devices (the combined output) and, therefore, the devices and the various promised goods and services inherent in producing those devices are not separately identifiable in accordance with paragraph 27(b) and paragraph 29 of SFRS(I) 15. In this case, the manufacturing process provided by the entity is specific to its contract with the customer. In addition, the nature of the entity's performance and, in particular, the significant integration service of the various activities means that a change in one of the entity's activities to produce the devices has a significant effect on the other activities required to produce the highly complex, specialised devices such that the entity's activities are highly interdependent and highly interrelated. Because the criterion in paragraph 27(b) of SFRS(I) 15 is not met, the goods and services that will be provided by the entity are not separately identifiable and, therefore, are not distinct. The entity accounts for all of the goods and services promised in the contract as a single performance obligation.

Example 11—Determining whether goods or services are distinct

Case A—Distinct goods or services

- IE49 An entity, a software developer, enters into a contract with a customer to transfer a software licence, perform an installation service and provide unspecified software updates and technical support (online and telephone) for a two-year period. The entity sells the licence, installation service and technical support separately. The installation service includes changing the web screen for each type of user (for example, marketing, inventory management and information technology). The installation service is routinely performed by other entities and does not significantly modify the software. The software remains functional without the updates and the technical support.
- IE50 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct in accordance with paragraph 27 of SFRS(I) 15. The entity observes that the software is delivered before the other goods and services and remains functional without the updates and the technical support. The customer can benefit from the updates together with the software licence transferred at the start of the contract. Thus, the entity concludes that the customer can benefit from each of the goods and services either on their own or together with the other goods and services that are readily available and the criterion in paragraph 27(a) of SFRS(I) 15 is met.
- IE51 The entity also considers the principle and the factors in paragraph 29 of SFRS(I) 15 and determines that the promise to transfer each good and service to the customer is separately identifiable from each of the other promises (thus the criterion in paragraph 27(b) of SFRS(I) 15 is met). In reaching this determination, the entity considers that, although it integrates the software into the customer's system, the installation services do not significantly affect the customer's ability to use and benefit from the software licence because the installation services are routine and can be obtained from alternative providers. The software updates do not significantly affect the customer's ability to use and benefit from the software licence during the licence period. The entity further observes that none of the promised goods or services significantly modify or customise one another, nor is the entity providing a significant

service of integrating the software and the services into a combined output. Lastly, the entity concludes that the software and the services do not significantly affect each other and, therefore, are not highly interdependent or highly interrelated, because the entity would be able to fulfil its promise to transfer the initial software licence independently from its promise to subsequently provide the installation service, software updates or technical support.

- IE52 On the basis of this assessment, the entity identifies four performance obligations in the contract for the following goods or services:
- (a) the software licence;
 - (b) an installation service;
 - (c) software updates; and
 - (d) technical support.
- IE53 The entity applies paragraphs 31–38 of SFRS(I) 15 to determine whether each of the performance obligations for the installation service, software updates and technical support are satisfied at a point in time or over time. The entity also assesses the nature of the entity's promise to transfer the software licence in accordance with paragraph B58 of SFRS(I) 15 (see Example 54 in paragraphs IE276–IE277).

Case B—Significant customisation

- IE54 The promised goods and services are the same as in Case A, except that the contract specifies that, as part of the installation service, the software is to be substantially customised to add significant new functionality to enable the software to interface with other customised software applications used by the customer. The customised installation service can be provided by other entities.
- IE55 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct in accordance with paragraph 27 of SFRS(I) 15. The entity first assesses whether the criterion in paragraph 27(a) has been met. For the same reasons as in Case A, the entity determines that the software licence, installation, software updates and technical support each meet that criterion. The entity next assesses whether the criterion in paragraph 27(b) has been met by evaluating the principle and the factors in paragraph 29 of SFRS(I) 15. The entity observes that the terms of the contract result in a promise to provide a significant service of integrating the licenced software into the existing software system by performing a customised installation service as specified in the contract. In other words, the entity is using the licence and the customised installation service as inputs to produce the combined output (ie a functional and integrated software system) specified in the contract (see paragraph 29(a) of SFRS(I) 15). The software is significantly modified and customised by the service (see paragraph 29(b) of SFRS(I) 15). Consequently, the entity determines that the promise to transfer the licence is not separately identifiable from the customised installation service and, therefore, the criterion in paragraph 27(b) of SFRS(I) 15 is not met. Thus, the software licence and the customised installation service are not distinct.
- IE56 On the basis of the same analysis as in Case A, the entity concludes that the software updates and technical support are distinct from the other promises in the contract.
- IE57 On the basis of this assessment, the entity identifies three performance obligations in the contract for the following goods or services:
- (a) software customisation (which comprises the licence for the software and the customised installation service);
 - (b) software updates; and
 - (c) technical support.

- IE58 The entity applies paragraphs 31–38 of SFRS(I) 15 to determine whether each performance obligation is satisfied at a point in time or over time.

Case C—Promises are separately identifiable (installation)

- IE58A An entity contracts with a customer to sell a piece of equipment and installation services. The equipment is operational without any customisation or modification. The installation required is not complex and is capable of being performed by several alternative service providers.

- IE58B The entity identifies two promised goods and services in the contract: (a) equipment and (b) installation. The entity assesses the criteria in paragraph 27 of SFRS(I) 15 to determine whether each promised good or service is distinct. The entity determines that the equipment and the installation each meet the criterion in paragraph 27(a) of SFRS(I) 15. The customer can benefit from the equipment on its own, by using it or reselling it for an amount greater than scrap value, or together with other readily available resources (for example, installation services available from alternative providers). The customer also can benefit from the installation services together with other resources that the customer will already have obtained from the entity (ie the equipment).

- IE58C The entity further determines that its promises to transfer the equipment and to provide the installation services are each separately identifiable (in accordance with paragraph 27(b) of SFRS(I) 15). The entity considers the principle and the factors in paragraph 29 of SFRS(I) 15 in determining that the equipment and the installation services are not inputs to a combined item in this contract. In this case, each of the factors in paragraph 29 of SFRS(I) 15 contributes to, but is not individually determinative of, the conclusion that the equipment and the installation services are separately identifiable as follows:

- (a) The entity is not providing a significant integration service. That is, the entity has promised to deliver the equipment and then install it; the entity would be able to fulfil its promise to transfer the equipment separately from its promise to subsequently install it. The entity has not promised to combine the equipment and the installation services in a way that would transform them into a combined output.
- (b) The entity's installation services will not significantly customise or significantly modify the equipment.
- (c) Although the customer can benefit from the installation services only after it has obtained control of the equipment, the installation services do not significantly affect the equipment because the entity would be able to fulfil its promise to transfer the equipment independently of its promise to provide the installation services. Because the equipment and the installation services do not each significantly affect the other, they are not highly interdependent or highly interrelated.

On the basis of this assessment, the entity identifies two performance obligations in the contract for the following goods or services:

- (i) the equipment; and
- (ii) installation services.

- IE58D The entity applies paragraphs 31–38 of SFRS(I) 15 to determine whether each performance obligation is satisfied at a point in time or over time.

Case D—Promises are separately identifiable (contractual restrictions)

- IE58E Assume the same facts as in Case C, except that the customer is contractually required to use the entity's installation services.

IE58F The contractual requirement to use the entity's installation services does not change the evaluation of whether the promised goods and services are distinct in this case. This is because the contractual requirement to use the entity's installation services does not change the characteristics of the goods or services themselves, nor does it change the entity's promises to the customer. Although the customer is required to use the entity's installation services, the equipment and the installation services are capable of being distinct (ie they each meet the criterion in paragraph 27(a) of SFRS(I) 15) and the entity's promises to provide the equipment and to provide the installation services are each separately identifiable, ie they each meet the criterion in paragraph 27(b) of SFRS(I) 15. The entity's analysis in this regard is consistent with that in Case C.

Case E—Promises are separately identifiable (consumables)

IE58G An entity enters into a contract with a customer to provide a piece of off-the-shelf equipment (ie the equipment is operational without any significant customisation or modification) and to provide specialised consumables for use in the equipment at predetermined intervals over the next three years. The consumables are produced only by the entity, but are sold separately by the entity.

IE58H The entity determines that the customer can benefit from the equipment together with the readily available consumables. The consumables are readily available in accordance with paragraph 28 of SFRS(I) 15, because they are regularly sold separately by the entity (ie through refill orders to customers that previously purchased the equipment). The customer can benefit from the consumables that will be delivered under the contract together with the delivered equipment that is transferred to the customer initially under the contract. Therefore, the equipment and the consumables are each capable of being distinct in accordance with paragraph 27(a) of SFRS(I) 15.

IE58I The entity determines that its promises to transfer the equipment and to provide consumables over a three-year period are each separately identifiable in accordance with paragraph 27(b) of SFRS(I) 15. In determining that the equipment and the consumables are not inputs to a combined item in this contract, the entity considers that it is not providing a significant integration service that transforms the equipment and consumables into a combined output. In addition, neither the equipment nor the consumables are significantly customised or modified by the other. Lastly, the entity concludes that the equipment and the consumables are not highly interdependent or highly interrelated because they do not significantly affect each other. Although the customer can benefit from the consumables in this contract only after it has obtained control of the equipment (ie the consumables would have no use without the equipment) and the consumables are required for the equipment to function, the equipment and the consumables do not each significantly affect the other. This is because the entity would be able to fulfil each of its promises in the contract independently of the other. That is, the entity would be able to fulfil its promise to transfer the equipment even if the customer did not purchase any consumables and would be able to fulfil its promise to provide the consumables, even if the customer acquired the equipment separately.

IE58J On the basis of this assessment, the entity identifies two performance obligations in the contract for the following goods or services:

- (a) the equipment; and
- (b) the consumables.

IE58K The entity applies paragraphs 31–38 of SFRS(I) 15 to determine whether each performance obligation is satisfied at a point in time or over time.

Example 12—Explicit and implicit promises in a contract

IE59 An entity, a manufacturer, sells a product to a distributor (ie its customer) who will then resell it to an end customer.

Case A—Explicit promise of service

IE60 In the contract with the distributor, the entity promises to provide maintenance services for no additional consideration (ie 'free') to any party (ie the end customer) that purchases the product from the distributor. The entity outsources the performance of the maintenance services to the distributor and pays the distributor an agreed-upon amount for providing those services on the entity's behalf. If the end customer does not use the maintenance services, the entity is not obliged to pay the distributor.

IE61 The contract with the customer includes two promised goods or services—(a) the product and (b) the maintenance services. The promise of maintenance services is a promise to transfer goods or services in the future and is part of the negotiated exchange between the entity and the distributor. The entity assesses whether each good or service is distinct in accordance with paragraph 27 of SFRS(I) 15. The entity determines that both the product and the maintenance services meet the criterion in paragraph 27(a) of SFRS(I) 15. The entity regularly sells the product on a stand-alone basis, which indicates that the customer can benefit from the product on its own. The customer can benefit from the maintenance services together with a resource the customer already has obtained from the entity (ie the product).

IE61A The entity further determines that its promises to transfer the product and to provide the maintenance services are separately identifiable (in accordance with paragraph 27(b) of SFRS(I) 15) on the basis of the principle and the factors in paragraph 29 of SFRS(I) 15. The product and the maintenance services are not inputs to a combined item in the contract. The entity is not providing a significant integration service because the presence of the product and the services together in this contract do not result in any additional or combined functionality. In addition, neither the product nor the services modify or customise the other. Lastly, the product and the maintenance services are not highly interdependent or highly interrelated because the entity would be able to fulfil each of the promises in the contract independently of its efforts to fulfil the other (ie the entity would be able to transfer the product even if the customer declined maintenance services and would be able to provide maintenance services in relation to products sold previously through other distributors). The entity also observes, in applying the principle in paragraph 29 of SFRS(I) 15, that the entity's promise to provide maintenance is not necessary for the product to continue to provide significant benefit to the customer. Consequently, the entity allocates a portion of the transaction price to each of the two performance obligations (ie the product and the maintenance services) in the contract.

Case B—Implicit promise of service

IE62 The entity has historically provided maintenance services for no additional consideration (ie 'free') to end customers that purchase the entity's product from the distributor. The entity does not explicitly promise maintenance services during negotiations with the distributor and the final contract between the entity and the distributor does not specify terms or conditions for those services.

IE63 However, on the basis of its customary business practice, the entity determines at contract inception that it has made an implicit promise to provide maintenance services as part of the negotiated exchange with the distributor. That is, the entity's past practices of providing these services create valid expectations of the entity's customers (ie the distributor and end customers) in accordance with paragraph 24 of SFRS(I) 15. Consequently, the entity assesses whether the promise of maintenance services is a performance obligation. For the same reasons as in Case A, the entity determines that the product and maintenance services are separate performance obligations.

Case C—Services are not a promised service

- IE64 In the contract with the distributor, the entity does not promise to provide any maintenance services. In addition, the entity typically does not provide maintenance services and, therefore, the entity's customary business practices, published policies and specific statements at the time of entering into the contract have not created an implicit promise to provide goods or services to its customers. The entity transfers control of the product to the distributor and, therefore, the contract is completed. However, before the sale to the end customer, the entity makes an offer to provide maintenance services to any party that purchases the product from the distributor for no additional promised consideration.
- IE65 The promise of maintenance is not included in the contract between the entity and the distributor at contract inception. That is, in accordance with paragraph 24 of SFRS(I) 15, the entity does not explicitly or implicitly promise to provide maintenance services to the distributor or the end customers. Consequently, the entity does not identify the promise to provide maintenance services as a performance obligation. Instead, the obligation to provide maintenance services is accounted for in accordance with SFRS(I) 1-37 *Provisions, Contingent Liabilities and Contingent Assets*.
- IE65A Although the maintenance services are not a promised service in the current contract, in future contracts with customers the entity would assess whether it has created a business practice resulting in an implied promise to provide maintenance services.

Performance obligations satisfied over time

- IE66 Examples 13–17 illustrate the requirements in paragraphs 35–37 and B2–B13 of SFRS(I) 15 on performance obligations satisfied over time. In addition, the following requirements are illustrated in these examples:
- (a) paragraphs 35(a) and B3–B4 of SFRS(I) 15 on when a customer simultaneously receives and consumes the benefits provided by the entity's performance as the entity performs (Examples 13–14);
 - (b) paragraphs 35(c), 36–37 and B6–B13 of SFRS(I) 15 on an entity's performance that does not create an asset with an alternative use and an entity's enforceable right to payment for performance completed to date (Examples 14–17); and
 - (c) paragraph 38 of SFRS(I) 15 on performance obligations satisfied at a point in time (Example 17).

Example 13—Customer simultaneously receives and consumes the benefits

- IE67 An entity enters into a contract to provide monthly payroll processing services to a customer for one year.
- IE68 The promised payroll processing services are accounted for as a single performance obligation in accordance with paragraph 22(b) of SFRS(I) 15. The performance obligation is satisfied over time in accordance with paragraph 35(a) of SFRS(I) 15 because the customer simultaneously receives and consumes the benefits of the entity's performance in processing each payroll transaction as and when each transaction is processed. The fact that another entity would not need to re-perform payroll processing services for the service that the entity has provided to date also demonstrates that the customer simultaneously receives and consumes the benefits of the entity's performance as the entity performs. (The entity disregards any practical limitations on transferring the remaining performance obligation, including setup activities that would need to be undertaken by another entity.) The entity recognises revenue over time by measuring its progress towards complete satisfaction of that performance obligation in accordance with paragraphs 39–45 and B14–B19 of SFRS(I) 15.

Example 14—Assessing alternative use and right to payment

- IE69 An entity enters into a contract with a customer to provide a consulting service that results in the entity providing a professional opinion to the customer. The professional opinion relates to facts and circumstances that are specific to the customer. If the customer were to terminate the consulting contract for reasons other than the entity's failure to perform as promised, the contract requires the customer to compensate the entity for its costs incurred plus a 15 per cent margin. The 15 per cent margin approximates the profit margin that the entity earns from similar contracts.
- IE70 The entity considers the criterion in paragraph 35(a) of SFRS(I) 15 and the requirements in paragraphs B3 and B4 of SFRS(I) 15 to determine whether the customer simultaneously receives and consumes the benefits of the entity's performance. If the entity were to be unable to satisfy its obligation and the customer hired another consulting firm to provide the opinion, the other consulting firm would need to substantially re-perform the work that the entity had completed to date, because the other consulting firm would not have the benefit of any work in progress performed by the entity. The nature of the professional opinion is such that the customer will receive the benefits of the entity's performance only when the customer receives the professional opinion. Consequently, the entity concludes that the criterion in paragraph 35(a) of SFRS(I) 15 is not met.
- IE71 However, the entity's performance obligation meets the criterion in paragraph 35(c) of SFRS(I) 15 and is a performance obligation satisfied over time because of both of the following factors:
- (a) in accordance with paragraphs 36 and B6–B8 of SFRS(I) 15, the development of the professional opinion does not create an asset with alternative use to the entity because the professional opinion relates to facts and circumstances that are specific to the customer. Therefore, there is a practical limitation on the entity's ability to readily direct the asset to another customer.
 - (b) in accordance with paragraphs 37 and B9–B13 of SFRS(I) 15, the entity has an enforceable right to payment for its performance completed to date for its costs plus a reasonable margin, which approximates the profit margin in other contracts.
- IE72 Consequently, the entity recognises revenue over time by measuring the progress towards complete satisfaction of the performance obligation in accordance with paragraphs 39–45 and B14–B19 of SFRS(I) 15.

Example 15—Asset has no alternative use to the entity

- IE73 An entity enters into a contract with a customer, a government agency, to build a specialised satellite. The entity builds satellites for various customers, such as governments and commercial entities. The design and construction of each satellite differ substantially, on the basis of each customer's needs and the type of technology that is incorporated into the satellite.
- IE74 At contract inception, the entity assesses whether its performance obligation to build the satellite is a performance obligation satisfied over time in accordance with paragraph 35 of SFRS(I) 15.
- IE75 As part of that assessment, the entity considers whether the satellite in its completed state will have an alternative use to the entity. Although the contract does not preclude the entity from directing the completed satellite to another customer, the entity would incur significant costs to rework the design and function of the satellite to direct that asset to another customer. Consequently, the asset has no alternative use to the entity (see paragraphs 35(c), 36 and B6–B8 of SFRS(I) 15) because the customer-specific design of the satellite limits the entity's practical ability to readily direct the satellite to another customer.

- IE76 For the entity's performance obligation to be satisfied over time when building the satellite, paragraph 35(c) of SFRS(I) 15 also requires the entity to have an enforceable right to payment for performance completed to date. This condition is not illustrated in this example.

Example 16—Enforceable right to payment for performance completed to date

- IE77 An entity enters into a contract with a customer to build an item of equipment. The payment schedule in the contract specifies that the customer must make an advance payment at contract inception of 10 per cent of the contract price, regular payments throughout the construction period (amounting to 50 per cent of the contract price) and a final payment of 40 per cent of the contract price after construction is completed and the equipment has passed the prescribed performance tests. The payments are non-refundable unless the entity fails to perform as promised. If the customer terminates the contract, the entity is entitled only to retain any progress payments received from the customer. The entity has no further rights to compensation from the customer.
- IE78 At contract inception, the entity assesses whether its performance obligation to build the equipment is a performance obligation satisfied over time in accordance with paragraph 35 of SFRS(I) 15.
- IE79 As part of that assessment, the entity considers whether it has an enforceable right to payment for performance completed to date in accordance with paragraphs 35(c), 37 and B9–B13 of SFRS(I) 15 if the customer were to terminate the contract for reasons other than the entity's failure to perform as promised. Even though the payments made by the customer are non-refundable, the cumulative amount of those payments is not expected, at all times throughout the contract, to at least correspond to the amount that would be necessary to compensate the entity for performance completed to date. This is because at various times during construction the cumulative amount of consideration paid by the customer might be less than the selling price of the partially completed item of equipment at that time. Consequently, the entity does not have a right to payment for performance completed to date.
- IE80 Because the entity does not have a right to payment for performance completed to date, the entity's performance obligation is not satisfied over time in accordance with paragraph 35(c) of SFRS(I) 15. Accordingly, the entity does not need to assess whether the equipment would have an alternative use to the entity. The entity also concludes that it does not meet the criteria in paragraph 35(a) or (b) of SFRS(I) 15 and thus, the entity accounts for the construction of the equipment as a performance obligation satisfied at a point in time in accordance with paragraph 38 of SFRS(I) 15.

Example 17—Assessing whether a performance obligation is satisfied at a point in time or over time

- IE81 An entity is developing a multi-unit residential complex. A customer enters into a binding sales contract with the entity for a specified unit that is under construction. Each unit has a similar floor plan and is of a similar size, but other attributes of the units are different (for example, the location of the unit within the complex).

Case A—Entity does not have an enforceable right to payment for performance completed to date

- IE82 The customer pays a deposit upon entering into the contract and the deposit is refundable only if the entity fails to complete construction of the unit in accordance with the contract. The remainder of the contract price is payable on completion of the contract when the customer obtains physical possession of the unit. If the customer defaults on the contract before completion of the unit, the entity only has the right to retain the deposit.

- IE83 At contract inception, the entity applies paragraph 35(c) of SFRS(I) 15 to determine whether its promise to construct and transfer the unit to the customer is a performance obligation satisfied over time. The entity determines that it does not have an enforceable right to payment for performance completed to date because, until construction of the unit is complete, the entity only has a right to the deposit paid by the customer. Because the entity does not have a right to payment for work completed to date, the entity's performance obligation is not a performance obligation satisfied over time in accordance with paragraph 35(c) of SFRS(I) 15. Instead, the entity accounts for the sale of the unit as a performance obligation satisfied at a point in time in accordance with paragraph 38 of SFRS(I) 15.

Case B—Entity has an enforceable right to payment for performance completed to date

- IE84 The customer pays a non-refundable deposit upon entering into the contract and will make progress payments during construction of the unit. The contract has substantive terms that preclude the entity from being able to direct the unit to another customer. In addition, the customer does not have the right to terminate the contract unless the entity fails to perform as promised. If the customer defaults on its obligations by failing to make the promised progress payments as and when they are due, the entity would have a right to all of the consideration promised in the contract if it completes the construction of the unit. The courts have previously upheld similar rights that entitle developers to require the customer to perform, subject to the entity meeting its obligations under the contract.
- IE85 At contract inception, the entity applies paragraph 35(c) of SFRS(I) 15 to determine whether its promise to construct and transfer the unit to the customer is a performance obligation satisfied over time. The entity determines that the asset (unit) created by the entity's performance does not have an alternative use to the entity because the contract precludes the entity from transferring the specified unit to another customer. The entity does not consider the possibility of a contract termination in assessing whether the entity is able to direct the asset to another customer.
- IE86 The entity also has a right to payment for performance completed to date in accordance with paragraphs 37 and B9–B13 of SFRS(I) 15. This is because if the customer were to default on its obligations, the entity would have an enforceable right to all of the consideration promised under the contract if it continues to perform as promised.
- IE87 Therefore, the terms of the contract and the practices in the legal jurisdiction indicate that there is a right to payment for performance completed to date. Consequently, the criteria in paragraph 35(c) of SFRS(I) 15 are met and the entity has a performance obligation that it satisfies over time. To recognise revenue for that performance obligation satisfied over time, the entity measures its progress towards complete satisfaction of its performance obligation in accordance with paragraphs 39–45 and B14–B19 of SFRS(I) 15.
- IE88 In the construction of a multi-unit residential complex, the entity may have many contracts with individual customers for the construction of individual units within the complex. The entity would account for each contract separately. However, depending on the nature of the construction, the entity's performance in undertaking the initial construction works (ie the foundation and the basic structure), as well as the construction of common areas, may need to be reflected when measuring its progress towards complete satisfaction of its performance obligations in each contract.

Case C—Entity has an enforceable right to payment for performance completed to date

- IE89 The same facts as in Case B apply to Case C, except that in the event of a default by the customer, either the entity can require the customer to perform as required under the contract or the entity can cancel the contract in exchange for the asset under construction and an entitlement to a penalty of a proportion of the contract price.

- IE90 Notwithstanding that the entity could cancel the contract (in which case the customer's obligation to the entity would be limited to transferring control of the partially completed asset to the entity and paying the penalty prescribed), the entity has a right to payment for performance completed to date because the entity could also choose to enforce its rights to full payment under the contract. The fact that the entity may choose to cancel the contract in the event the customer defaults on its obligations would not affect that assessment (see paragraph B11 of SFRS(I) 15), provided that the entity's rights to require the customer to continue to perform as required under the contract (ie pay the promised consideration) are enforceable.

Measuring progress towards complete satisfaction of a performance obligation

- IE91 Examples 18–19 illustrate the requirements in paragraphs 39–45 of SFRS(I) 15 on measuring progress towards complete satisfaction of a performance obligation satisfied over time. Example 19 also illustrates the requirements in paragraph B19 of SFRS(I) 15 on uninstalled materials when costs incurred are not proportionate to the entity's progress in satisfying a performance obligation.

Example 18—Measuring progress when making goods or services available

- IE92 An entity, an owner and manager of health clubs, enters into a contract with a customer for one year of access to any of its health clubs. The customer has unlimited use of the health clubs and promises to pay CU100 per month.
- IE93 The entity determines that its promise to the customer is to provide a service of making the health clubs available for the customer to use as and when the customer wishes. This is because the extent to which the customer uses the health clubs does not affect the amount of the remaining goods and services to which the customer is entitled. The entity concludes that the customer simultaneously receives and consumes the benefits of the entity's performance as it performs by making the health clubs available. Consequently, the entity's performance obligation is satisfied over time in accordance with paragraph 35(a) of SFRS(I) 15.
- IE94 The entity also determines that the customer benefits from the entity's service of making the health clubs available evenly throughout the year. (That is, the customer benefits from having the health clubs available, regardless of whether the customer uses it or not.) Consequently, the entity concludes that the best measure of progress towards complete satisfaction of the performance obligation over time is a time-based measure and it recognises revenue on a straight-line basis throughout the year at CU100 per month.

Example 19—Uninstalled materials

- IE95 In November 20X2, an entity contracts with a customer to refurbish a 3-storey building and install new elevators for total consideration of CU5 million. The promised refurbishment service, including the installation of elevators, is a single performance obligation satisfied over time. Total expected costs are CU4 million, including CU1.5 million for the elevators. The entity determines that it acts as a principal in accordance with paragraphs B34–B38 of SFRS(I) 15, because it obtains control of the elevators before they are transferred to the customer.

IE96 A summary of the transaction price and expected costs is as follows:

CU	
Transaction price	5,000,000
Expected costs:	
Elevators	1,500,000
Other costs	<u>2,500,000</u>
Total expected costs	<u><u>4,000,000</u></u>

IE97 The entity uses an input method based on costs incurred to measure its progress towards complete satisfaction of the performance obligation. The entity assesses whether the costs incurred to procure the elevators are proportionate to the entity's progress in satisfying the performance obligation, in accordance with paragraph B19 of SFRS(I) 15. The customer obtains control of the elevators when they are delivered to the site in December 20X2, although the elevators will not be installed until June 20X3. The costs to procure the elevators (CU1.5 million) are significant relative to the total expected costs to completely satisfy the performance obligation (CU4 million). The entity is not involved in designing or manufacturing the elevators.

IE98 The entity concludes that including the costs to procure the elevators in the measure of progress would overstate the extent of the entity's performance. Consequently, in accordance with paragraph B19 of SFRS(I) 15, the entity adjusts its measure of progress to exclude the costs to procure the elevators from the measure of costs incurred and from the transaction price. The entity recognises revenue for the transfer of the elevators in an amount equal to the costs to procure the elevators (ie at a zero margin).

IE99 As of 31 December 20X2 the entity observes that:

- (a) other costs incurred (excluding elevators) are CU500,000; and
- (b) performance is 20 per cent complete (ie $CU500,000 \div CU2,500,000$).

IE100 Consequently, at 31 December 20X2, the entity recognises the following:

CU	
Revenue	2,200,000 ^(a)
Cost of goods sold	<u>2,000,000^(b)</u>
Profit	<u><u>200,000</u></u>

(a) Revenue recognised is calculated as $(20 \text{ per cent} \times CU3,500,000) + CU1,500,000$. (CU3,500,000 is CU5,000,000 transaction price – CU1,500,000 costs of elevators.)

(b) Cost of goods sold is CU500,000 of costs incurred + CU1,500,000 costs of elevators.

Variable consideration

IE101 Examples 20–21 illustrate the requirements in paragraphs 50–54 of SFRS(I) 15 on identifying variable consideration.

Example 20—Penalty gives rise to variable consideration

- IE102 An entity enters into a contract with a customer to build an asset for CU1 million. In addition, the terms of the contract include a penalty of CU100,000 if the construction is not completed within three months of a date specified in the contract.
- IE103 The entity concludes that the consideration promised in the contract includes a fixed amount of CU900,000 and a variable amount of CU100,000 (arising from the penalty).
- IE104 The entity estimates the variable consideration in accordance with paragraphs 50–54 of SFRS(I) 15 and considers the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration.

Example 21—Estimating variable consideration

- IE105 An entity enters into a contract with a customer to build a customised asset. The promise to transfer the asset is a performance obligation that is satisfied over time. The promised consideration is CU2.5 million, but that amount will be reduced or increased depending on the timing of completion of the asset. Specifically, for each day after 31 March 20X7 that the asset is incomplete, the promised consideration is reduced by CU10,000. For each day before 31 March 20X7 that the asset is complete, the promised consideration increases by CU10,000.
- IE106 In addition, upon completion of the asset, a third party will inspect the asset and assign a rating based on metrics that are defined in the contract. If the asset receives a specified rating, the entity will be entitled to an incentive bonus of CU150,000.
- IE107 In determining the transaction price, the entity prepares a separate estimate for each element of variable consideration to which the entity will be entitled using the estimation methods described in paragraph 53 of SFRS(I) 15:
- (a) the entity decides to use the expected value method to estimate the variable consideration associated with the daily penalty or incentive (ie CU2.5 million, plus or minus CU10,000 per day). This is because it is the method that the entity expects to better predict the amount of consideration to which it will be entitled.
 - (b) the entity decides to use the most likely amount to estimate the variable consideration associated with the incentive bonus. This is because there are only two possible outcomes (CU150,000 or CU0) and it is the method that the entity expects to better predict the amount of consideration to which it will be entitled.
- IE108 The entity considers the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration to determine whether the entity should include some or all of its estimate of variable consideration in the transaction price.

Constraining estimates of variable consideration

- IE109 Examples 22–25 illustrate the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration. In addition, the following requirements are illustrated in these examples:
- (a) paragraph 55 of SFRS(I) 15 on refund liabilities (Example 22);
 - (b) paragraphs B20–B27 of SFRS(I) 15 on sales with a right of return (Example 22); and
 - (c) paragraphs 84–86 of SFRS(I) 15 on allocating variable consideration to performance obligations (Example 25).

Example 22—Right of return

- IE110 An entity enters into 100 contracts with customers. Each contract includes the sale of one product for CU100 (100 total products × CU100 = CU10,000 total consideration). Cash is received when control of a product transfers. The entity's customary business practice is to allow a customer to return any unused product within 30 days and receive a full refund. The entity's cost of each product is CU60.
- IE111 The entity applies the requirements in SFRS(I) 15 to the portfolio of 100 contracts because it reasonably expects that, in accordance with paragraph 4, the effects on the financial statements from applying these requirements to the portfolio would not differ materially from applying the requirements to the individual contracts within the portfolio.
- IE112 Because the contract allows a customer to return the products, the consideration received from the customer is variable. To estimate the variable consideration to which the entity will be entitled, the entity decides to use the expected value method (see paragraph 53(a) of SFRS(I) 15) because it is the method that the entity expects to better predict the amount of consideration to which it will be entitled. Using the expected value method, the entity estimates that 97 products will not be returned.
- IE113 The entity also considers the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration to determine whether the estimated amount of variable consideration of CU9,700 (CU100 × 97 products not expected to be returned) can be included in the transaction price. The entity considers the factors in paragraph 57 of SFRS(I) 15 and determines that although the returns are outside the entity's influence, it has significant experience in estimating returns for this product and customer class. In addition, the uncertainty will be resolved within a short time frame (ie the 30-day return period). Thus, the entity concludes that it is highly probable that a significant reversal in the cumulative amount of revenue recognised (ie CU9,700) will not occur as the uncertainty is resolved (ie over the return period).
- IE114 The entity estimates that the costs of recovering the products will be immaterial and expects that the returned products can be resold at a profit.
- IE115 Upon transfer of control of the 100 products, the entity does not recognise revenue for the three products that it expects to be returned. Consequently, in accordance with paragraphs 55 and B21 of SFRS(I) 15, the entity recognises the following:
- (a) revenue of CU9,700 (CU100 × 97 products not expected to be returned);
 - (b) a refund liability of CU300 (CU100 refund × 3 products expected to be returned); and
 - (c) an asset of CU180 (CU60 × 3 products for its right to recover products from customers on settling the refund liability).

Example 23—Price concessions

- IE116 An entity enters into a contract with a customer, a distributor, on 1 December 20X7. The entity transfers 1,000 products at contract inception for a price stated in the contract of CU100 per product (total consideration is CU100,000). Payment from the customer is due when the customer sells the products to the end customers. The entity's customer generally sells the products within 90 days of obtaining them. Control of the products transfers to the customer on 1 December 20X7.
- IE117 On the basis of its past practices and to maintain its relationship with the customer, the entity anticipates granting a price concession to its customer because this will enable the customer to discount the product and thereby move the product through the distribution chain. Consequently, the consideration in the contract is variable.

Case A—Estimate of variable consideration is not constrained

- IE118 The entity has significant experience selling this and similar products. The observable data indicate that historically the entity grants a price concession of approximately 20 per cent of the sales price for these products. Current market information suggests that a 20 per cent reduction in price will be sufficient to move the products through the distribution chain. The entity has not granted a price concession significantly greater than 20 per cent in many years.
- IE119 To estimate the variable consideration to which the entity will be entitled, the entity decides to use the expected value method (see paragraph 53(a) of SFRS(I) 15) because it is the method that the entity expects to better predict the amount of consideration to which it will be entitled. Using the expected value method, the entity estimates the transaction price to be CU80,000 (CU80 × 1,000 products).
- IE120 The entity also considers the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration to determine whether the estimated amount of variable consideration of CU80,000 can be included in the transaction price. The entity considers the factors in paragraph 57 of SFRS(I) 15 and determines that it has significant previous experience with this product and current market information that supports its estimate. In addition, despite some uncertainty resulting from factors outside its influence, based on its current market estimates, the entity expects the price to be resolved within a short time frame. Thus, the entity concludes that it is highly probable that a significant reversal in the cumulative amount of revenue recognised (ie CU80,000) will not occur when the uncertainty is resolved (ie when the total amount of price concessions is determined). Consequently, the entity recognises CU80,000 as revenue when the products are transferred on 1 December 20X7.

Case B—Estimate of variable consideration is constrained

- IE121 The entity has experience selling similar products. However, the entity's products have a high risk of obsolescence and the entity is experiencing high volatility in the pricing of its products. The observable data indicate that historically the entity grants a broad range of price concessions ranging from 20–60 per cent of the sales price for similar products. Current market information also suggests that a 15–50 per cent reduction in price may be necessary to move the products through the distribution chain.
- IE122 To estimate the variable consideration to which the entity will be entitled, the entity decides to use the expected value method (see paragraph 53(a) of SFRS(I) 15) because it is the method that the entity expects to better predict the amount of consideration to which it will be entitled. Using the expected value method, the entity estimates that a discount of 40 per cent will be provided and, therefore, the estimate of the variable consideration is CU60,000 (CU60 × 1,000 products).
- IE123 The entity also considers the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration to determine whether some or all of the estimated amount of variable consideration of CU60,000 can be included in the transaction price. The entity considers the factors in paragraph 57 of SFRS(I) 15 and observes that the amount of consideration is highly susceptible to factors outside the entity's influence (ie risk of obsolescence) and it is likely that the entity may be required to provide a broad range of price concessions to move the products through the distribution chain. Consequently, the entity cannot include its estimate of CU60,000 (ie a discount of 40 per cent) in the transaction price because it cannot conclude that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Although the entity's historical price concessions have ranged from 20–60 per cent, market information currently suggests that a price concession of 15–50 per cent will be necessary. The entity's actual results have been consistent with then-current market information in previous, similar transactions. Consequently, the entity concludes that it is highly probable that a significant reversal in the cumulative amount of revenue recognised will not occur if the entity includes CU50,000 in the transaction price (CU100 sales price and a 50 per cent price concession) and therefore,

recognises revenue at that amount. Therefore, the entity recognises revenue of CU50,000 when the products are transferred and reassesses the estimates of the transaction price at each reporting date until the uncertainty is resolved in accordance with paragraph 59 of SFRS(I) 15.

Example 24—Volume discount incentive

- IE124 An entity enters into a contract with a customer on 1 January 20X8 to sell Product A for CU100 per unit. If the customer purchases more than 1,000 units of Product A in a calendar year, the contract specifies that the price per unit is retrospectively reduced to CU90 per unit. Consequently, the consideration in the contract is variable.
- IE125 For the first quarter ended 31 March 20X8, the entity sells 75 units of Product A to the customer. The entity estimates that the customer's purchases will not exceed the 1,000-unit threshold required for the volume discount in the calendar year.
- IE126 The entity considers the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration, including the factors in paragraph 57 of SFRS(I) 15. The entity determines that it has significant experience with this product and with the purchasing pattern of the entity. Thus, the entity concludes that it is highly probable that a significant reversal in the cumulative amount of revenue recognised (ie CU100 per unit) will not occur when the uncertainty is resolved (ie when the total amount of purchases is known). Consequently, the entity recognises revenue of CU7,500 (75 units × CU100 per unit) for the quarter ended 31 March 20X8.
- IE127 In May 20X8, the entity's customer acquires another company and in the second quarter ended 30 June 20X8 the entity sells an additional 500 units of Product A to the customer. In the light of the new fact, the entity estimates that the customer's purchases will exceed the 1,000-unit threshold for the calendar year and therefore it will be required to retrospectively reduce the price per unit to CU90.
- IE128 Consequently, the entity recognises revenue of CU44,250 for the quarter ended 30 June 20X8. That amount is calculated from CU45,000 for the sale of 500 units (500 units × CU90 per unit) less the change in transaction price of CU750 (75 units × CU10 price reduction) for the reduction of revenue relating to units sold for the quarter ended 31 March 20X8 (see paragraphs 87 and 88 of SFRS(I) 15).

Example 25—Management fees subject to the constraint

- IE129 On 1 January 20X8, an entity enters into a contract with a client to provide asset management services for five years. The entity receives a two per cent quarterly management fee based on the client's assets under management at the end of each quarter. In addition, the entity receives a performance-based incentive fee of 20 per cent of the fund's return in excess of the return of an observable market index over the five-year period. Consequently, both the management fee and the performance fee in the contract are variable consideration.
- IE130 The entity accounts for the services as a single performance obligation in accordance with paragraph 22(b) of SFRS(I) 15, because it is providing a series of distinct services that are substantially the same and have the same pattern of transfer (the services transfer to the customer over time and use the same method to measure progress—that is, a time-based measure of progress).
- IE131 At contract inception, the entity considers the requirements in paragraphs 50–54 of SFRS(I) 15 on estimating variable consideration and the requirements in paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration, including the factors in paragraph 57 of SFRS(I) 15. The entity observes that the promised consideration is dependent on the market and thus is highly susceptible to factors outside the entity's influence. In addition, the incentive fee has a large number and a broad range of possible

consideration amounts. The entity also observes that although it has experience with similar contracts, that experience is of little predictive value in determining the future performance of the market. Therefore, at contract inception, the entity cannot conclude that it is highly probable that a significant reversal in the cumulative amount of revenue recognised would not occur if the entity included its estimate of the management fee or the incentive fee in the transaction price.

- IE132 At each reporting date, the entity updates its estimate of the transaction price. Consequently, at the end of each quarter, the entity concludes that it can include in the transaction price the actual amount of the quarterly management fee because the uncertainty is resolved. However, the entity concludes that it cannot include its estimate of the incentive fee in the transaction price at those dates. This is because there has not been a change in its assessment from contract inception—the variability of the fee based on the market index indicates that the entity cannot conclude that it is highly probable that a significant reversal in the cumulative amount of revenue recognised would not occur if the entity included its estimate of the incentive fee in the transaction price. At 31 March 20X8, the client’s assets under management are CU100 million. Therefore, the resulting quarterly management fee and the transaction price is CU2 million.
- IE133 At the end of each quarter, the entity allocates the quarterly management fee to the distinct services provided during the quarter in accordance with paragraphs 84(b) and 85 of SFRS(I) 15. This is because the fee relates specifically to the entity’s efforts to transfer the services for that quarter, which are distinct from the services provided in other quarters, and the resulting allocation will be consistent with the allocation objective in paragraph 73 of SFRS(I) 15. Consequently, the entity recognises CU2 million as revenue for the quarter ended 31 March 20X8.

The existence of a significant financing component in the contract

- IE134 Examples 26–30 illustrate the requirements in paragraphs 60–65 of SFRS(I) 15 on the existence of a significant financing component in the contract. In addition, the following requirements are illustrated in Example 26:
- (a) paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration; and
 - (b) paragraphs B20–B27 of SFRS(I) 15 on sales with a right of return.

Example 26—Significant financing component and right of return

- IE135 An entity sells a product to a customer for CU121 that is payable 24 months after delivery. The customer obtains control of the product at contract inception. The contract permits the customer to return the product within 90 days. The product is new and the entity has no relevant historical evidence of product returns or other available market evidence.
- IE136 The cash selling price of the product is CU100, which represents the amount that the customer would pay upon delivery for the same product sold under otherwise identical terms and conditions as at contract inception. The entity’s cost of the product is CU80.
- IE137 The entity does not recognise revenue when control of the product transfers to the customer. This is because the existence of the right of return and the lack of relevant historical evidence means that the entity cannot conclude that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur in accordance with paragraphs 56–58 of SFRS(I) 15. Consequently, revenue is recognised after three months when the right of return lapses.

IE138 The contract includes a significant financing component, in accordance with paragraphs 60–62 of SFRS(I) 15. This is evident from the difference between the amount of promised consideration of CU121 and the cash selling price of CU100 at the date that the goods are transferred to the customer.

IE139 The contract includes an implicit interest rate of 10 per cent (ie the interest rate that over 24 months discounts the promised consideration of CU121 to the cash selling price of CU100). The entity evaluates the rate and concludes that it is commensurate with the rate that would be reflected in a separate financing transaction between the entity and its customer at contract inception. The following journal entries illustrate how the entity accounts for this contract in accordance with paragraphs B20–B27 of SFRS(I) 15.

- (a) When the product is transferred to the customer, in accordance with paragraph B21 of SFRS(I) 15:

Asset for right to recover product to be returned	CU80 ^(a)	
Inventory		CU80

- (a) This example does not consider expected costs to recover the asset.

- (b) During the three-month right of return period, no interest is recognised in accordance with paragraph 65 of SFRS(I) 15 because no contract asset or receivable has been recognised.

- (c) When the right of return lapses (the product is not returned):

Receivable	CU100 ^(a)	
Revenue		CU100
Cost of sales	CU80	
Asset for product to be returned		CU80

- (a) The receivable recognised would be measured in accordance with SFRS(I) 9. This example assumes there is no material difference between the fair value of the receivable at contract inception and the fair value of the receivable when it is recognised at the time the right of return lapses. In addition, this example does not consider the impairment accounting for the receivable.

IE140 Until the entity receives the cash payment from the customer, interest revenue would be recognised in accordance with SFRS(I) 9. In determining the effective interest rate in accordance with SFRS(I) 9, the entity would consider the remaining contractual term.

Example 27—Withheld payments on a long-term contract

IE141 An entity enters into a contract for the construction of a building that includes scheduled milestone payments for the performance by the entity throughout the contract term of three years. The performance obligation will be satisfied over time and the milestone payments are scheduled to coincide with the entity's expected performance. The contract provides that a specified percentage of each milestone payment is to be withheld (ie retained) by the customer throughout the arrangement and paid to the entity only when the building is complete.

IE142 The entity concludes that the contract does not include a significant financing component. The milestone payments coincide with the entity's performance and the contract requires amounts to be retained for reasons other than the provision of finance in accordance with

paragraph 62(c) of SFRS(I) 15. The withholding of a specified percentage of each milestone payment is intended to protect the customer from the contractor failing to adequately complete its obligations under the contract.

Example 28—Determining the discount rate

IE143 An entity enters into a contract with a customer to sell equipment. Control of the equipment transfers to the customer when the contract is signed. The price stated in the contract is CU1 million plus a five per cent contractual rate of interest, payable in 60 monthly instalments of CU18,871.

Case A—Contractual discount rate reflects the rate in a separate financing transaction

IE144 In evaluating the discount rate in the contract that contains a significant financing component, the entity observes that the five per cent contractual rate of interest reflects the rate that would be used in a separate financing transaction between the entity and its customer at contract inception (ie the contractual rate of interest of five per cent reflects the credit characteristics of the customer).

IE145 The market terms of the financing mean that the cash selling price of the equipment is CU1 million. This amount is recognised as revenue and as a loan receivable when control of the equipment transfers to the customer. The entity accounts for the receivable in accordance with SFRS(I) 9.

Case B—Contractual discount rate does not reflect the rate in a separate financing transaction

IE146 In evaluating the discount rate in the contract that contains a significant financing component, the entity observes that the five per cent contractual rate of interest is significantly lower than the 12 per cent interest rate that would be used in a separate financing transaction between the entity and its customer at contract inception (ie the contractual rate of interest of five per cent does not reflect the credit characteristics of the customer). This suggests that the cash selling price is less than CU1 million.

IE147 In accordance with paragraph 64 of SFRS(I) 15, the entity determines the transaction price by adjusting the promised amount of consideration to reflect the contractual payments using the 12 per cent interest rate that reflects the credit characteristics of the customer. Consequently, the entity determines that the transaction price is CU848,357 (60 monthly payments of CU18,871 discounted at 12 per cent). The entity recognises revenue and a loan receivable for that amount. The entity accounts for the loan receivable in accordance with SFRS(I) 9.

Example 29—Advance payment and assessment of discount rate

IE148 An entity enters into a contract with a customer to sell an asset. Control of the asset will transfer to the customer in two years (ie the performance obligation will be satisfied at a point in time). The contract includes two alternative payment options: payment of CU5,000 in two years when the customer obtains control of the asset or payment of CU4,000 when the contract is signed. The customer elects to pay CU4,000 when the contract is signed.

IE149 The entity concludes that the contract contains a significant financing component because of the length of time between when the customer pays for the asset and when the entity transfers the asset to the customer, as well as the prevailing interest rates in the market.

IE150 The interest rate implicit in the transaction is 11.8 per cent, which is the interest rate necessary to make the two alternative payment options economically equivalent. However, the entity determines that, in accordance with paragraph 64 of SFRS(I) 15, the rate that should be used in adjusting the promised consideration is six per cent, which is the entity's incremental borrowing rate.

IE151 The following journal entries illustrate how the entity would account for the significant financing component:

- (a) recognise a contract liability for the CU4,000 payment received at contract inception:

Cash	CU4,000	
		Contract liability
		CU4,000

- (b) during the two years from contract inception until the transfer of the asset, the entity adjusts the promised amount of consideration (in accordance with paragraph 65 of SFRS(I) 15) and accretes the contract liability by recognising interest on CU4,000 at six per cent for two years:

Interest expense	CU494 ^(a)	
		Contract liability
		CU494

- (a) $CU494 = CU4,000 \text{ contract liability} \times (6 \text{ per cent interest per year for two years})$.

- (c) recognise revenue for the transfer of the asset:

Contract liability	CU4,494	
		Revenue
		CU4,494

Example 30—Advance payment

IE152 An entity, a technology product manufacturer, enters into a contract with a customer to provide global telephone technology support and repair coverage for three years along with its technology product. The customer purchases this support service at the time of buying the product. Consideration for the service is an additional CU300. Customers electing to buy this service must pay for it upfront (ie a monthly payment option is not available).

IE153 To determine whether there is a significant financing component in the contract, the entity considers the nature of the service being offered and the purpose of the payment terms. The entity charges a single upfront amount, not with the primary purpose of obtaining financing from the customer but, instead, to maximise profitability, taking into consideration the risks associated with providing the service. Specifically, if customers could pay monthly, they would be less likely to renew and the population of customers that continue to use the support service in the later years may become smaller and less diverse over time (ie customers that choose to renew historically are those that make greater use of the service, thereby increasing the entity's costs). In addition, customers tend to use services more if they pay monthly rather than making an upfront payment. Finally, the entity would incur higher administration costs such as the costs related to administering renewals and collection of monthly payments.

IE154 In assessing the requirements in paragraph 62(c) of SFRS(I) 15, the entity determines that the payment terms were structured primarily for reasons other than the provision of finance to the entity. The entity charges a single upfront amount for the services because other payment terms (such as a monthly payment plan) would affect the nature of the risks

assumed by the entity to provide the service and may make it uneconomical to provide the service. As a result of its analysis, the entity concludes that there is not a significant financing component.

Non-cash consideration

- IE155 Example 31 illustrates the requirements in paragraphs 66–69 of SFRS(I) 15 on non-cash consideration. In addition, the following requirements are illustrated in this example:
- (a) paragraph 22 of SFRS(I) 15 on identifying performance obligations; and
 - (b) paragraphs 56–58 of SFRS(I) 15 on constraining estimates of variable consideration.

Example 31—Entitlement to non-cash consideration

- IE156 An entity enters into a contract with a customer to provide a weekly service for one year. The contract is signed on 1 January 20X1 and work begins immediately. The entity concludes that the service is a single performance obligation in accordance with paragraph 22(b) of SFRS(I) 15. This is because the entity is providing a series of distinct services that are substantially the same and have the same pattern of transfer (the services transfer to the customer over time and use the same method to measure progress—that is, a time-based measure of progress).
- IE157 In exchange for the service, the customer promises 100 shares of its common stock per week of service (a total of 5,200 shares for the contract). The terms in the contract require that the shares must be paid upon the successful completion of each week of service.
- IE158 The entity measures its progress towards complete satisfaction of the performance obligation as each week of service is complete. To determine the transaction price (and the amount of revenue to be recognised), the entity measures the fair value of 100 shares that are received upon completion of each weekly service. The entity does not reflect any subsequent changes in the fair value of the shares received (or receivable) in revenue.

Consideration payable to a customer

- IE159 Example 32 illustrates the requirements in paragraphs 70–72 of SFRS(I) 15 on consideration payable to a customer.

Example 32—Consideration payable to a customer

- IE160 An entity that manufactures consumer goods enters into a one-year contract to sell goods to a customer that is a large global chain of retail stores. The customer commits to buy at least CU15 million of products during the year. The contract also requires the entity to make a non-refundable payment of CU1.5 million to the customer at the inception of the contract. The CU1.5 million payment will compensate the customer for the changes it needs to make to its shelving to accommodate the entity's products.
- IE161 The entity considers the requirements in paragraphs 70–72 of SFRS(I) 15 and concludes that the payment to the customer is not in exchange for a distinct good or service that transfers to the entity. This is because the entity does not obtain control of any rights to the customer's shelves. Consequently, the entity determines that, in accordance with paragraph 70 of SFRS(I) 15, the CU1.5 million payment is a reduction of the transaction price.
- IE162 The entity applies the requirements in paragraph 72 of SFRS(I) 15 and concludes that the consideration payable is accounted for as a reduction in the transaction price when the entity recognises revenue for the transfer of the goods. Consequently, as the entity transfers goods to the customer, the entity reduces the transaction price for each good by 10 per cent (CU1.5 million ÷ CU15 million). Therefore, in the first month in which the entity transfers goods to the

customer, the entity recognises revenue of CU1.8 million (CU2.0 million invoiced amount less CU0.2 million of consideration payable to the customer).

Allocating the transaction price to performance obligations

- IE163 Examples 33–35 illustrate the requirements in paragraphs 73–86 of SFRS(I) 15 on allocating the transaction price to performance obligations. In addition, the following requirements are illustrated in Example 35:
- (a) paragraph 53 of SFRS(I) 15 on variable consideration; and
 - (b) paragraph B63 of SFRS(I) 15 on consideration in the form of sales-based or usage-based royalties on licences of intellectual property.

Example 33—Allocation methodology

- IE164 An entity enters into a contract with a customer to sell Products A, B and C in exchange for CU100. The entity will satisfy the performance obligations for each of the products at different points in time. The entity regularly sells Product A separately and therefore the stand-alone selling price is directly observable. The stand-alone selling prices of Products B and C are not directly observable.
- IE165 Because the stand-alone selling prices for Products B and C are not directly observable, the entity must estimate them. To estimate the stand-alone selling prices, the entity uses the adjusted market assessment approach for Product B and the expected cost plus a margin approach for Product C. In making those estimates, the entity maximises the use of observable inputs (in accordance with paragraph 78 of SFRS(I) 15). The entity estimates the stand-alone selling prices as follows:

Product	Stand-alone selling price	Method
CU		
Product A	50	Directly observable (see paragraph 77 of SFRS(I) 15)
Product B	25	Adjusted market assessment approach (see paragraph 79(a) of SFRS(I) 15)
Product C	75	Expected cost plus a margin approach (see paragraph 79(b) of SFRS(I) 15)
Total	150	

- IE166 The customer receives a discount for purchasing the bundle of goods because the sum of the stand-alone selling prices (CU150) exceeds the promised consideration (CU100). The entity considers whether it has observable evidence about the performance obligation to which the entire discount belongs (in accordance with paragraph 82 of SFRS(I) 15) and concludes that it does not. Consequently, in accordance with paragraphs 76 and 81 of SFRS(I) 15, the discount is allocated proportionately across Products A, B and C. The discount, and therefore the transaction price, is allocated as follows:

Product	Allocated transaction price
CU	
Product A	33 (CU50 ÷ CU150 × CU100)

Product	Allocated transaction price
	CU
Product B	17 (CU25 ÷ CU150 × CU100)
Product C	50 (CU75 ÷ CU150 × CU100)
Total	100

Example 34—Allocating a discount

IE167 An entity regularly sells Products A, B and C individually, thereby establishing the following stand-alone selling prices:

Product	Stand-alone selling price
	CU
Product A	40
Product B	55
Product C	45
Total	140

IE168 In addition, the entity regularly sells Products B and C together for CU60.

Case A—Allocating a discount to one or more performance obligations

IE169 The entity enters into a contract with a customer to sell Products A, B and C in exchange for CU100. The entity will satisfy the performance obligations for each of the products at different points in time.

IE170 The contract includes a discount of CU40 on the overall transaction, which would be allocated proportionately to all three performance obligations when allocating the transaction price using the relative stand-alone selling price method (in accordance with paragraph 81 of SFRS(I) 15). However, because the entity regularly sells Products B and C together for CU60 and Product A for CU40, it has evidence that the entire discount should be allocated to the promises to transfer Products B and C in accordance with paragraph 82 of SFRS(I) 15.

IE171 If the entity transfers control of Products B and C at the same point in time, then the entity could, as a practical matter, account for the transfer of those products as a single performance obligation. That is, the entity could allocate CU60 of the transaction price to the single performance obligation and recognise revenue of CU60 when Products B and C simultaneously transfer to the customer.

IE172 If the contract requires the entity to transfer control of Products B and C at different points in time, then the allocated amount of CU60 is individually allocated to the promises to transfer Product B (stand-alone selling price of CU55) and Product C (stand-alone selling price of CU45) as follows:

Product	Allocated transaction price	
	CU	
Product B	33	(CU55 ÷ CU100 total stand-alone selling price × CU60)
Product C	27	(CU45 ÷ CU100 total stand-alone selling price × CU60)
Total	60	

Case B—Residual approach is appropriate

- IE173 The entity enters into a contract with a customer to sell Products A, B and C as described in Case A. The contract also includes a promise to transfer Product D. Total consideration in the contract is CU130. The stand-alone selling price for Product D is highly variable (see paragraph 79(c) of SFRS(I) 15) because the entity sells Product D to different customers for a broad range of amounts (CU15–CU45). Consequently, the entity decides to estimate the stand-alone selling price of Product D using the residual approach.
- IE174 Before estimating the stand-alone selling price of Product D using the residual approach, the entity determines whether any discount should be allocated to the other performance obligations in the contract in accordance with paragraphs 82 and 83 of SFRS(I) 15.
- IE175 As in Case A, because the entity regularly sells Products B and C together for CU60 and Product A for CU40, it has observable evidence that CU100 should be allocated to those three products and a CU40 discount should be allocated to the promises to transfer Products B and C in accordance with paragraph 82 of SFRS(I) 15. Using the residual approach, the entity estimates the stand-alone selling price of Product D to be CU30 as follows:

Product	Stand-alone selling price	Method
	CU	
Product A	40	Directly observable (see paragraph 77 of SFRS(I) 15)
Products B and C	60	Directly observable with discount (see paragraph 82 of SFRS(I) 15)
Product D	30	Residual approach (see paragraph 79(c) of SFRS(I) 15)
Total	130	

- IE176 The entity observes that the resulting CU30 allocated to Product D is within the range of its observable selling prices (CU15–CU45). Therefore, the resulting allocation (see above table) is consistent with the allocation objective in paragraph 73 of SFRS(I) 15 and the requirements in paragraph 78 of SFRS(I) 15.

Case C—Residual approach is inappropriate

- IE177 The same facts as in Case B apply to Case C except the transaction price is CU105 instead of CU130. Consequently, the application of the residual approach would result in a stand-alone selling price of CU5 for Product D (CU105 transaction price less CU100 allocated to Products A, B and C). The entity concludes that CU5 would not faithfully depict the amount of consideration to which the entity expects to be entitled in exchange for satisfying its performance obligation to transfer Product D, because CU5 does not approximate the stand-alone selling price of Product D, which ranges from CU15–CU45. Consequently, the entity reviews its observable data, including sales and margin reports, to estimate the stand-alone

selling price of Product D using another suitable method. The entity allocates the transaction price of CU105 to Products A, B, C and D using the relative stand-alone selling prices of those products in accordance with paragraphs 73–80 of SFRS(I) 15.

Example 35—Allocation of variable consideration

IE178 An entity enters into a contract with a customer for two intellectual property licences (Licences X and Y), which the entity determines to represent two performance obligations each satisfied at a point in time. The stand-alone selling prices of Licences X and Y are CU800 and CU1,000, respectively.

Case A—Variable consideration allocated entirely to one performance obligation

IE179 The price stated in the contract for Licence X is a fixed amount of CU800 and for Licence Y the consideration is three per cent of the customer's future sales of products that use Licence Y. For purposes of allocation, the entity estimates its sales-based royalties (ie the variable consideration) to be CU1,000, in accordance with paragraph 53 of SFRS(I) 15.

IE180 To allocate the transaction price, the entity considers the criteria in paragraph 85 of SFRS(I) 15 and concludes that the variable consideration (ie the sales-based royalties) should be allocated entirely to Licence Y. The entity concludes that the criteria in paragraph 85 of SFRS(I) 15 are met for the following reasons:

- (a) the variable payment relates specifically to an outcome from the performance obligation to transfer Licence Y (ie the customer's subsequent sales of products that use Licence Y).
- (b) allocating the expected royalty amounts of CU1,000 entirely to Licence Y is consistent with the allocation objective in paragraph 73 of SFRS(I) 15. This is because the entity's estimate of the amount of sales-based royalties (CU1,000) approximates the stand-alone selling price of Licence Y and the fixed amount of CU800 approximates the stand-alone selling price of Licence X. The entity allocates CU800 to Licence X in accordance with paragraph 86 of SFRS(I) 15. This is because, based on an assessment of the facts and circumstances relating to both licences, allocating to Licence Y some of the fixed consideration in addition to all of the variable consideration would not meet the allocation objective in paragraph 73 of SFRS(I) 15.

IE181 The entity transfers Licence Y at inception of the contract and transfers Licence X one month later. Upon the transfer of Licence Y, the entity does not recognise revenue because the consideration allocated to Licence Y is in the form of a sales-based royalty. Therefore, in accordance with paragraph B63 of SFRS(I) 15, the entity recognises revenue for the sales-based royalty when those subsequent sales occur.

IE182 When Licence X is transferred, the entity recognises as revenue the CU800 allocated to Licence X.

Case B—Variable consideration allocated on the basis of stand-alone selling prices

IE183 The price stated in the contract for Licence X is a fixed amount of CU300 and for Licence Y the consideration is five per cent of the customer's future sales of products that use Licence Y. The entity's estimate of the sales-based royalties (ie the variable consideration) is CU1,500 in accordance with paragraph 53 of SFRS(I) 15.

IE184 To allocate the transaction price, the entity applies the criteria in paragraph 85 of SFRS(I) 15 to determine whether to allocate the variable consideration (ie the sales-based royalties) entirely to Licence Y. In applying the criteria, the entity concludes that even though the variable payments relate specifically to an outcome from the performance obligation to

transfer Licence Y (ie the customer's subsequent sales of products that use Licence Y), allocating the variable consideration entirely to Licence Y would be inconsistent with the principle for allocating the transaction price. Allocating CU300 to Licence X and CU1,500 to Licence Y does not reflect a reasonable allocation of the transaction price on the basis of the stand-alone selling prices of Licences X and Y of CU800 and CU1,000, respectively. Consequently, the entity applies the general allocation requirements in paragraphs 76–80 of SFRS(I) 15.

- IE185 The entity allocates the transaction price of CU300 to Licences X and Y on the basis of relative stand-alone selling prices of CU800 and CU1,000, respectively. The entity also allocates the consideration related to the sales-based royalty on a relative stand-alone selling price basis. However, in accordance with paragraph B63 of SFRS(I) 15, when an entity licenses intellectual property in which the consideration is in the form of a sales-based royalty, the entity cannot recognise revenue until the later of the following events: the subsequent sales occur or the performance obligation is satisfied (or partially satisfied).
- IE186 Licence Y is transferred to the customer at the inception of the contract and Licence X is transferred three months later. When Licence Y is transferred, the entity recognises as revenue the CU167 ($CU1,000 \div CU1,800 \times CU300$) allocated to Licence Y. When Licence X is transferred, the entity recognises as revenue the CU133 ($CU800 \div CU1,800 \times CU300$) allocated to Licence X.
- IE187 In the first month, the royalty due from the customer's first month of sales is CU200. Consequently, in accordance with paragraph B63 of SFRS(I) 15, the entity recognises as revenue the CU111 ($CU1,000 \div CU1,800 \times CU200$) allocated to Licence Y (which has been transferred to the customer and is therefore a satisfied performance obligation). The entity recognises a contract liability for the CU89 ($CU800 \div CU1,800 \times CU200$) allocated to Licence X. This is because although the subsequent sale by the entity's customer has occurred, the performance obligation to which the royalty has been allocated has not been satisfied.

Contract costs

- IE188 Examples 36–37 illustrate the requirements in paragraphs 91–94 of SFRS(I) 15 on incremental costs of obtaining a contract, paragraphs 95–98 of SFRS(I) 15 on costs to fulfil a contract and paragraphs 99–104 of SFRS(I) 15 on amortisation and impairment of contract costs.

Example 36—Incremental costs of obtaining a contract

- IE189 An entity, a provider of consulting services, wins a competitive bid to provide consulting services to a new customer. The entity incurred the following costs to obtain the contract:

	CU
External legal fees for due diligence	15,000
Travel costs to deliver proposal	25,000
Commissions to sales employees	10,000
Total costs incurred	50,000

- IE190 In accordance with paragraph 91 of SFRS(I) 15, the entity recognises an asset for the CU10,000 incremental costs of obtaining the contract arising from the commissions to sales employees because the entity expects to recover those costs through future fees for the consulting services. The entity also pays discretionary annual bonuses to sales supervisors based on annual sales targets, overall profitability of the entity and individual performance evaluations. In accordance with paragraph 91 of SFRS(I) 15, the entity does not recognise

an asset for the bonuses paid to sales supervisors because the bonuses are not incremental to obtaining a contract. The amounts are discretionary and are based on other factors, including the profitability of the entity and the individuals' performance. The bonuses are not directly attributable to identifiable contracts.

- IE191 The entity observes that the external legal fees and travel costs would have been incurred regardless of whether the contract was obtained. Therefore, in accordance with paragraph 93 of SFRS(I) 15, those costs are recognised as expenses when incurred, unless they are within the scope of another Standard, in which case, the relevant provisions of that Standard apply.

Example 37—Costs that give rise to an asset

- IE192 An entity enters into a service contract to manage a customer's information technology data centre for five years. The contract is renewable for subsequent one-year periods. The average customer term is seven years. The entity pays an employee a CU10,000 sales commission upon the customer signing the contract. Before providing the services, the entity designs and builds a technology platform for the entity's internal use that interfaces with the customer's systems. That platform is not transferred to the customer, but will be used to deliver services to the customer.

Incremental costs of obtaining a contract

- IE193 In accordance with paragraph 91 of SFRS(I) 15, the entity recognises an asset for the CU10,000 incremental costs of obtaining the contract for the sales commission because the entity expects to recover those costs through future fees for the services to be provided. The entity amortises the asset over seven years in accordance with paragraph 99 of SFRS(I) 15, because the asset relates to the services transferred to the customer during the contract term of five years and the entity anticipates that the contract will be renewed for two subsequent one-year periods.

Costs to fulfil a contract

- IE194 The initial costs incurred to set up the technology platform are as follows:

	CU
Design services	40,000
Hardware	120,000
Software	90,000
Migration and testing of data centre	100,000
Total costs	350,000

- IE195 The initial setup costs relate primarily to activities to fulfil the contract but do not transfer goods or services to the customer. The entity accounts for the initial setup costs as follows:

- (a) hardware costs—accounted for in accordance with SFRS(I) 1-16 *Property, Plant and Equipment*.
- (b) software costs—accounted for in accordance with SFRS(I) 1-38 *Intangible Assets*.
- (c) costs of the design, migration and testing of the data centre—assessed in accordance with paragraph 95 of SFRS(I) 15 to determine whether an asset can be recognised for the costs to fulfil the contract. Any resulting asset would be amortised on a systematic

basis over the seven-year period (ie the five-year contract term and two anticipated one-year renewal periods) that the entity expects to provide services related to the data centre.

- IE196 In addition to the initial costs to set up the technology platform, the entity also assigns two employees who are primarily responsible for providing the service to the customer. Although the costs for these two employees are incurred as part of providing the service to the customer, the entity concludes that the costs do not generate or enhance resources of the entity (see paragraph 95(b) of SFRS(I) 15). Therefore, the costs do not meet the criteria in paragraph 95 of SFRS(I) 15 and cannot be recognised as an asset using SFRS(I) 15. In accordance with paragraph 98, the entity recognises the payroll expense for these two employees when incurred.

Presentation

- IE197 Examples 38–40 illustrate the requirements in paragraphs 105–109 of SFRS(I) 15 on the presentation of contract balances.

Example 38—Contract liability and receivable

Case A—Cancellable contract

- IE198 On 1 January 20X9, an entity enters into a cancellable contract to transfer a product to a customer on 31 March 20X9. The contract requires the customer to pay consideration of CU1,000 in advance on 31 January 20X9. The customer pays the consideration on 1 March 20X9. The entity transfers the product on 31 March 20X9. The following journal entries illustrate how the entity accounts for the contract:

- (a) The entity receives cash of CU1,000 on 1 March 20X9 (cash is received in advance of performance):

Cash	CU1,000	
Contract liability		CU1,000

- (b) The entity satisfies the performance obligation on 31 March 20X9:

Contract liability	CU1,000	
Revenue		CU1,000

Case B—Non-cancellable contract

- IE199 The same facts as in Case A apply to Case B except that the contract is non-cancellable. The following journal entries illustrate how the entity accounts for the contract:

- (a) The amount of consideration is due on 31 January 20X9 (which is when the entity recognises a receivable because it has an unconditional right to consideration):

Receivable	CU1,000	
Contract liability		CU1,000

- (b) The entity receives the cash on 1 March 20X9:

Cash	CU1,000
Receivable	CU1,000

(c) The entity satisfies the performance obligation on 31 March 20X9:

Contract liability	CU1,000
Revenue	CU1,000

IE200 If the entity issued the invoice before 31 January 20X9 (the due date of the consideration), the entity would not present the receivable and the contract liability on a gross basis in the statement of financial position because the entity does not yet have a right to consideration that is unconditional.

Example 39—Contract asset recognised for the entity’s performance

IE201 On 1 January 20X8, an entity enters into a contract to transfer Products A and B to a customer in exchange for CU1,000. The contract requires Product A to be delivered first and states that payment for the delivery of Product A is conditional on the delivery of Product B. In other words, the consideration of CU1,000 is due only after the entity has transferred both Products A and B to the customer. Consequently, the entity does not have a right to consideration that is unconditional (a receivable) until both Products A and B are transferred to the customer.

IE202 The entity identifies the promises to transfer Products A and B as performance obligations and allocates CU400 to the performance obligation to transfer Product A and CU600 to the performance obligation to transfer Product B on the basis of their relative stand-alone selling prices. The entity recognises revenue for each respective performance obligation when control of the product transfers to the customer.

IE203 The entity satisfies the performance obligation to transfer Product A:

Contract asset	CU400
Revenue	CU400

IE204 The entity satisfies the performance obligation to transfer Product B and to recognise the unconditional right to consideration:

Receivable	CU1,000
Contract asset	CU400
Revenue	CU600

Example 40—Receivable recognised for the entity’s performance

IE205 An entity enters into a contract with a customer on 1 January 20X9 to transfer products to the customer for CU150 per product. If the customer purchases more than 1 million products in a calendar year, the contract indicates that the price per unit is retrospectively reduced to CU125 per product.

IE206 Consideration is due when control of the products transfer to the customer. Therefore, the entity has an unconditional right to consideration (ie a receivable) for CU150 per product until the retrospective price reduction applies (ie after 1 million products are shipped).

IE207 In determining the transaction price, the entity concludes at contract inception that the customer will meet the 1 million products threshold and therefore estimates that the transaction price is CU125 per product. Consequently, upon the first shipment to the customer of 100 products the entity recognises the following:

Receivable	CU15,000 ^(a)
Revenue	CU12,500 ^(b)
Refund liability (contract liability)	CU2,500

(a) CU150 per product × 100 products.

(b) CU125 transaction price per product × 100 products.

IE208 The refund liability (see paragraph 55 of SFRS(I) 15) represents a refund of CU25 per product, which is expected to be provided to the customer for the volume-based rebate (ie the difference between the CU150 price stated in the contract that the entity has an unconditional right to receive and the CU125 estimated transaction price).

Disclosure

IE209 Example 41 illustrates the requirements in paragraphs 114–115 and B87–B89 of SFRS(I) 15 on the disaggregation of revenue disclosure. Examples 42–43 illustrate the requirements in paragraphs 120–122 of SFRS(I) 15 for the disclosure of the transaction price allocated to the remaining performance obligations. In addition, the following requirements are illustrated in Example 42:

(a) paragraph 57 of SFRS(I) 15 on constraining estimates of variable consideration; and

(b) paragraph B16 of SFRS(I) 15 on methods for measuring progress towards complete satisfaction of a performance obligation.

Example 41—Disaggregation of revenue—quantitative disclosure

IE210 An entity reports the following segments: consumer products, transportation and energy, in accordance with SFRS(I) 8 *Operating Segments*. When the entity prepares its investor presentations, it disaggregates revenue into primary geographical markets, major product lines and timing of revenue recognition (ie goods transferred at a point in time or services transferred over time).

IE211 The entity determines that the categories used in the investor presentations can be used to meet the objective of the disaggregation disclosure requirement in paragraph 114 of SFRS(I) 15, which is to disaggregate revenue from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. The following table illustrates the disaggregation disclosure by primary geographical market, major product line and timing of revenue recognition, including a reconciliation of how the disaggregated revenue ties in with the consumer products, transportation and energy segments, in accordance with paragraph 115 of SFRS(I) 15.

Segments	Consumer products	Transport	Energy	Total
	CU	CU	CU	CU
<u>Primary geographical markets</u>				
North America	990	2,250	5,250	8,490
Europe	300	750	1,000	2,050
Asia	700	260	–	960
	1,990	3,260	6,250	11,500
<u>Major goods/service lines</u>				
Office supplies	600	–	–	600
Appliances	990	–	–	990
Clothing	400	–	–	400
Motorcycles	–	500	–	500
Automobiles	–	2,760	–	2,760
Solar panels	–	–	1,000	1,000
Power plant	–	–	5,250	5,250
	1,990	3,260	6,250	11,500
<u>Timing of revenue recognition</u>				
Goods transferred at a point in time	1,990	3,260	1,000	6,250
Services transferred over time	–	–	5,250	5,250
	1,990	3,260	6,250	11,500

Example 42—Disclosure of the transaction price allocated to the remaining performance obligations

IE212 On 30 June 20X7, an entity enters into three contracts (Contracts A, B and C) with separate customers to provide services. Each contract has a two-year non-cancellable term. The entity considers the requirements in paragraphs 120–122 of SFRS(I) 15 in determining the information in each contract to be included in the disclosure of the transaction price allocated to the remaining performance obligations at 31 December 20X7.

Contract A

IE213 Cleaning services are to be provided over the next two years typically at least once per month. For services provided, the customer pays an hourly rate of CU25.

- IE214 Because the entity bills a fixed amount for each hour of service provided, the entity has a right to invoice the customer in the amount that corresponds directly with the value of the entity's performance completed to date in accordance with paragraph B16 of SFRS(I) 15. Consequently, no disclosure is necessary if the entity elects to apply the practical expedient in paragraph 121(b) of SFRS(I) 15.

Contract B

- IE215 Cleaning services and lawn maintenance services are to be provided as and when needed with a maximum of four visits per month over the next two years. The customer pays a fixed price of CU400 per month for both services. The entity measures its progress towards complete satisfaction of the performance obligation using a time-based measure.
- IE216 The entity discloses the amount of the transaction price that has not yet been recognised as revenue in a table with quantitative time bands that illustrates when the entity expects to recognise the amount as revenue. The information for Contract B included in the overall disclosure is as follows:

	20X8	20X9	Total
	CU	CU	CU
Revenue expected to be recognised on this contract as of 31 December 20X7	4,800 ^(a)	2,400 ^(b)	7,200

(a) CU4,800 = CU400 × 12 months.

(b) CU2,400 = CU400 × 6 months.

Contract C

- IE217 Cleaning services are to be provided as and when needed over the next two years. The customer pays fixed consideration of CU100 per month plus a one-time variable consideration payment ranging from CU0–CU1,000 corresponding to a one-time regulatory review and certification of the customer's facility (ie a performance bonus). The entity estimates that it will be entitled to CU750 of the variable consideration. On the basis of the entity's assessment of the factors in paragraph 57 of SFRS(I) 15, the entity includes its estimate of CU750 of variable consideration in the transaction price because it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. The entity measures its progress towards complete satisfaction of the performance obligation using a time-based measure.
- IE218 The entity discloses the amount of the transaction price that has not yet been recognised as revenue in a table with quantitative time bands that illustrates when the entity expects to recognise the amount as revenue. The entity also includes a qualitative discussion about any significant variable consideration that is not included in the disclosure. The information for Contract C included in the overall disclosure is as follows:

	20X8	20X9	Total
	CU	CU	CU
Revenue expected to be recognised on this contract as of 31 December 20X7	1,575 ^(a)	788 ^(b)	2,363

(a) Transaction price = CU3,150 (CU100 × 24 months + CU750 variable consideration) recognised evenly over 24 months at CU1,575 per year.

(b) CU1,575 ÷ 2 = CU788 (ie for 6 months of the year).

- IE219 In addition, in accordance with paragraph 122 of SFRS(I) 15, the entity discloses qualitatively that part of the performance bonus has been excluded from the disclosure because it was not included in the transaction price. That part of the performance bonus was excluded from the transaction price in accordance with the requirements for constraining estimates of variable consideration.

Example 43—Disclosure of the transaction price allocated to the remaining performance obligations—qualitative disclosure

- IE220 On 1 January 20X2, an entity enters into a contract with a customer to construct a commercial building for fixed consideration of CU10 million. The construction of the building is a single performance obligation that the entity satisfies over time. As of 31 December 20X2, the entity has recognised CU3.2 million of revenue. The entity estimates that construction will be completed in 20X3, but it is possible that the project will be completed in the first half of 20X4.
- IE221 At 31 December 20X2, the entity discloses the amount of the transaction price that has not yet been recognised as revenue in its disclosure of the transaction price allocated to the remaining performance obligations. The entity also discloses an explanation of when the entity expects to recognise that amount as revenue. The explanation can be disclosed either on a quantitative basis using time bands that are most appropriate for the duration of the remaining performance obligation or by providing a qualitative explanation. Because the entity is uncertain about the timing of revenue recognition, the entity discloses this information qualitatively as follows:

‘As of 31 December 20X2, the aggregate amount of the transaction price allocated to the remaining performance obligation is CU6.8 million and the entity will recognise this revenue as the building is completed, which is expected to occur over the next 12–18 months.’

Warranties

- IE222 Example 44 illustrates the requirements in paragraphs B28–B33 of SFRS(I) 15 on warranties. In addition, Example 44 illustrates the requirements in paragraphs 27–29 of SFRS(I) 15 on identifying performance obligations.

Example 44—Warranties

- IE223 An entity, a manufacturer, provides its customer with a warranty with the purchase of a product. The warranty provides assurance that the product complies with agreed-upon specifications and will operate as promised for one year from the date of purchase. The contract also provides the customer with the right to receive up to 20 hours of training services on how to operate the product at no additional cost.
- IE224 The entity assesses the goods and services in the contract to determine whether they are distinct and therefore give rise to separate performance obligations.
- IE225 The product and training services are each capable of being distinct in accordance with paragraphs 27(a) and 28 of SFRS(I) 15, because the customer can benefit from the product on its own without the training services and can benefit from the training services together with the product that already has been transferred by the entity. The entity regularly sells the product separately without the training services.
- IE226 The entity next assesses whether its promises to transfer the product and to provide the training services are separately identifiable in accordance with paragraphs 27(b) and 29 of SFRS(I) 15. The entity does not provide a significant service of integrating the training services with the product (see paragraph 29(a) of SFRS(I) 15). The training services and product do not significantly modify or customise each other (see paragraph 29(b) of SFRS(I)

15). The product and the training services are not highly interdependent or highly interrelated (see paragraph 29(c) of SFRS(I) 15). The entity would be able to fulfil its promise to transfer the product independently of its efforts to subsequently provide the training services, and would be able to provide training services to any customer that had previously acquired its product. Consequently, the entity concludes that its promise to transfer the product and its promise to provide training services are not inputs to a combined item, and, therefore, are each separately identifiable.

- IE227 The product and training services are each distinct in accordance with paragraph 27 of SFRS(I) 15 and therefore give rise to two separate performance obligations.
- IE228 Finally, the entity assesses the promise to provide a warranty and observes that the warranty provides the customer with the assurance that the product will function as intended for one year. The entity concludes, in accordance with paragraphs B28–B33 of SFRS(I) 15, that the warranty does not provide the customer with a good or service in addition to that assurance and, therefore, the entity does not account for it as a performance obligation. The entity accounts for the assurance-type warranty in accordance with the requirements in SFRS(I) 1-37.
- IE229 As a result, the entity allocates the transaction price to the two performance obligations (the product and the training services) and recognises revenue when (or as) those performance obligations are satisfied.

Principal versus agent considerations

- IE230 Examples 45–48A illustrate the requirements in paragraphs B34–B38 of SFRS(I) 15 on principal versus agent considerations.

Example 45—Arranging for the provision of goods or services (entity is an agent)

- IE231 An entity operates a website that enables customers to purchase goods from a range of suppliers who deliver the goods directly to the customers. Under the terms of the entity's contracts with suppliers, when a good is purchased via the website, the entity is entitled to a commission that is equal to 10 per cent of the sales price. The entity's website facilitates payment between the supplier and the customer at prices that are set by the supplier. The entity requires payment from customers before orders are processed and all orders are non-refundable. The entity has no further obligations to the customer after arranging for the products to be provided to the customer.
- IE232 To determine whether the entity's performance obligation is to provide the specified goods itself (ie the entity is a principal) or to arrange for those goods to be provided by the supplier (ie the entity is an agent), the entity identifies the specified good or service to be provided to the customer and assesses whether it controls that good or service before the good or service is transferred to the customer.
- IE232A The website operated by the entity is a marketplace in which suppliers offer their goods and customers purchase the goods that are offered by the suppliers. Accordingly, the entity observes that the specified goods to be provided to customers that use the website are the goods provided by the suppliers, and no other goods or services are promised to customers by the entity.
- IE232B The entity concludes that it does not control the specified goods before they are transferred to customers that order goods using the website. The entity does not at any time have the ability to direct the use of the goods transferred to customers. For example, it cannot direct the goods to parties other than the customer or prevent the supplier from transferring those goods to the customer. The entity does not control the suppliers' inventory of goods used to fulfil the orders placed by customers using the website.

IE232C As part of reaching that conclusion, the entity considers the following indicators in paragraph B37 of SFRS(I) 15. The entity concludes that these indicators provide further evidence that it does not control the specified goods before they are transferred to the customers:

- (a) the supplier is primarily responsible for fulfilling the promise to provide the goods to the customer. The entity is neither obliged to provide the goods if the supplier fails to transfer the goods to the customer, nor responsible for the acceptability of the goods.
- (b) the entity does not take inventory risk at any time before or after the goods are transferred to the customer. The entity does not commit itself to obtain the goods from the supplier before the goods are purchased by the customer, and does not accept responsibility for any damaged or returned goods.
- (c) the entity does not have discretion in establishing prices for the supplier's goods. The sales price is set by the supplier.

IE233 Consequently, the entity concludes that it is an agent and its performance obligation is to arrange for the provision of goods by the supplier. When the entity satisfies its promise to arrange for the goods to be provided by the supplier to the customer (which, in this example, is when goods are purchased by the customer), the entity recognises revenue in the amount of the commission to which it is entitled.

Example 46—Promise to provide goods or services (entity is a principal)

IE234 An entity enters into a contract with a customer for equipment with unique specifications. The entity and the customer develop the specifications for the equipment, which the entity communicates to a supplier that the entity contracts with to manufacture the equipment. The entity also arranges to have the supplier deliver the equipment directly to the customer. Upon delivery of the equipment to the customer, the terms of the contract require the entity to pay the supplier the price agreed to by the entity and the supplier for manufacturing the equipment.

IE235 The entity and the customer negotiate the selling price and the entity invoices the customer for the agreed-upon price with 30-day payment terms. The entity's profit is based on the difference between the sales price negotiated with the customer and the price charged by the supplier.

IE236 The contract between the entity and the customer requires the customer to seek remedies for defects in the equipment from the supplier under the supplier's warranty. However, the entity is responsible for any corrections to the equipment required resulting from errors in specifications.

IE237 To determine whether the entity's performance obligation is to provide the specified goods or services itself (ie the entity is a principal) or to arrange for those goods or services to be provided by another party (ie the entity is an agent), the entity identifies the specified good or service to be provided to the customer and assesses whether it controls that good or service before the good or service is transferred to the customer.

IE237A The entity concludes that it has promised to provide the customer with specialised equipment designed by the entity. Although the entity has subcontracted the manufacturing of the equipment to the supplier, the entity concludes that the design and manufacturing of the equipment are not distinct, because they are not separately identifiable (ie there is a single performance obligation). The entity is responsible for the overall management of the contract (for example, by ensuring that the manufacturing service conforms to the specifications) and, thus, provides a significant service of integrating those items into the combined output—the specialised equipment—for which the customer has contracted. In addition, those activities are highly interrelated. If necessary modifications to the specifications are identified as the equipment is manufactured, the entity is responsible for developing and communicating

revisions to the supplier and for ensuring that any associated rework required conforms with the revised specifications. Accordingly, the entity identifies the specified good to be provided to the customer as the specialised equipment.

- IE237B The entity concludes that it controls the specialised equipment before that equipment is transferred to the customer (see paragraph B35A(c)). The entity provides the significant integration service necessary to produce the specialised equipment and, therefore, controls the specialised equipment before it is transferred to the customer. The entity directs the use of the supplier's manufacturing service as an input in creating the combined output that is the specialised equipment. In reaching the conclusion that it controls the specialised equipment before that equipment is transferred to the customer, the entity also observes that, even though the supplier delivers the specialised equipment to the customer, the supplier has no ability to direct its use (ie the terms of the contract between the entity and the supplier preclude the supplier from using the specialised equipment for another purpose or directing that equipment to another customer). The entity also obtains the remaining benefits from the specialised equipment by being entitled to the consideration in the contract from the customer.
- IE238 Thus, the entity concludes that it is a principal in the transaction. The entity does not consider the indicators in paragraph B37 of SFRS(I) 15 because the evaluation above is conclusive without consideration of the indicators. The entity recognises revenue in the gross amount of consideration to which it is entitled from the customer in exchange for the specialised equipment.

Example 46A—Promise to provide goods or services (entity is a principal)

- IE238A An entity enters into a contract with a customer to provide office maintenance services. The entity and the customer define and agree on the scope of the services and negotiate the price. The entity is responsible for ensuring that the services are performed in accordance with the terms and conditions in the contract. The entity invoices the customer for the agreed-upon price on a monthly basis with 10-day payment terms.
- IE238B The entity regularly engages third-party service providers to provide office maintenance services to its customers. When the entity obtains a contract from a customer, the entity enters into a contract with one of those service providers, directing the service provider to perform office maintenance services for the customer. The payment terms in the contracts with the service providers are generally aligned with the payment terms in the entity's contracts with customers. However, the entity is obliged to pay the service provider even if the customer fails to pay.
- IE238C To determine whether the entity is a principal or an agent, the entity identifies the specified good or service to be provided to the customer and assesses whether it controls that good or service before the good or service is transferred to the customer.
- IE238D The entity observes that the specified services to be provided to the customer are the office maintenance services for which the customer contracted, and that no other goods or services are promised to the customer. While the entity obtains a right to office maintenance services from the service provider after entering into the contract with the customer, that right is not transferred to the customer. That is, the entity retains the ability to direct the use of, and obtain substantially all the remaining benefits from, that right. For example, the entity can decide whether to direct the service provider to provide the office maintenance services for that customer, or for another customer, or at its own facilities. The customer does not have a right to direct the service provider to perform services that the entity has not agreed to provide. Therefore, the right to office maintenance services obtained by the entity from the service provider is not the specified good or service in its contract with the customer.

IE238E The entity concludes that it controls the specified services before they are provided to the customer. The entity obtains control of a right to office maintenance services after entering into the contract with the customer but before those services are provided to the customer. The terms of the entity's contract with the service provider give the entity the ability to direct the service provider to provide the specified services on the entity's behalf (see paragraph B35A(b)). In addition, the entity concludes that the following indicators in paragraph B37 of SFRS(I) 15 provide further evidence that the entity controls the office maintenance services before they are provided to the customer:

- (a) the entity is primarily responsible for fulfilling the promise to provide office maintenance services. Although the entity has hired a service provider to perform the services promised to the customer, it is the entity itself that is responsible for ensuring that the services are performed and are acceptable to the customer (ie the entity is responsible for fulfilment of the promise in the contract, regardless of whether the entity performs the services itself or engages a third-party service provider to perform the services).
- (b) the entity has discretion in setting the price for the services to the customer.

IE238F The entity observes that it does not commit itself to obtain the services from the service provider before obtaining the contract with the customer. Thus, the entity has mitigated inventory risk with respect to the office maintenance services. Nonetheless, the entity concludes that it controls the office maintenance services before they are provided to the customer on the basis of the evidence in paragraph IE238E.

IE238G Thus, the entity is a principal in the transaction and recognises revenue in the amount of consideration to which it is entitled from the customer in exchange for the office maintenance services.

Example 47—Promise to provide goods or services (entity is a principal)

IE239 An entity negotiates with major airlines to purchase tickets at reduced rates compared with the price of tickets sold directly by the airlines to the public. The entity agrees to buy a specific number of tickets and must pay for those tickets regardless of whether it is able to resell them. The reduced rate paid by the entity for each ticket purchased is negotiated and agreed in advance.

IE240 The entity determines the prices at which the airline tickets will be sold to its customers. The entity sells the tickets and collects the consideration from customers when the tickets are purchased.

IE241 The entity also assists the customers in resolving complaints with the service provided by the airlines. However, each airline is responsible for fulfilling obligations associated with the ticket, including remedies to a customer for dissatisfaction with the service.

IE242 To determine whether the entity's performance obligation is to provide the specified goods or services itself (ie the entity is a principal) or to arrange for those goods or services to be provided by another party (ie the entity is an agent), the entity identifies the specified good or service to be provided to the customer and assesses whether it controls that good or service before the good or service is transferred to the customer.

IE242A The entity concludes that, with each ticket that it commits itself to purchase from the airline, it obtains control of a right to fly on a specified flight (in the form of a ticket) that the entity then transfers to one of its customers (see paragraph B35A(a)). Consequently, the entity determines that the specified good or service to be provided to its customer is that right (to a seat on a specific flight) that the entity controls. The entity observes that no other goods or services are promised to the customer.

- IE242B The entity controls the right to each flight before it transfers that specified right to one of its customers because the entity has the ability to direct the use of that right by deciding whether to use the ticket to fulfil a contract with a customer and, if so, which contract it will fulfil. The entity also has the ability to obtain the remaining benefits from that right by either reselling the ticket and obtaining all of the proceeds from the sale or, alternatively, using the ticket itself.
- IE242C The indicators in paragraphs B37(b)–(c) of SFRS(I) 15 also provide relevant evidence that the entity controls each specified right (ticket) before it is transferred to the customer. The entity has inventory risk with respect to the ticket because the entity committed itself to obtain the ticket from the airline before obtaining a contract with a customer to purchase the ticket. This is because the entity is obliged to pay the airline for that right regardless of whether it is able to obtain a customer to resell the ticket to or whether it can obtain a favourable price for the ticket. The entity also establishes the price that the customer will pay for the specified ticket.
- IE243 Thus, the entity concludes that it is a principal in the transactions with customers. The entity recognises revenue in the gross amount of consideration to which it is entitled in exchange for the tickets transferred to the customers.

Example 48—Arranging for the provision of goods or services (entity is an agent)

- IE244 An entity sells vouchers that entitle customers to future meals at specified restaurants. The sales price of the voucher provides the customer with a significant discount when compared with the normal selling prices of the meals (for example, a customer pays CU100 for a voucher that entitles the customer to a meal at a restaurant that would otherwise cost CU200). The entity does not purchase or commit itself to purchase vouchers in advance of the sale of a voucher to a customer; instead, it purchases vouchers only as they are requested by the customers. The entity sells the vouchers through its website and the vouchers are non-refundable.
- IE245 The entity and the restaurants jointly determine the prices at which the vouchers will be sold to customers. Under the terms of its contracts with the restaurants, the entity is entitled to 30 per cent of the voucher price when it sells the voucher.
- IE246 The entity also assists the customers in resolving complaints about the meals and has a buyer satisfaction programme. However, the restaurant is responsible for fulfilling obligations associated with the voucher, including remedies to a customer for dissatisfaction with the service.
- IE247 To determine whether the entity is a principal or an agent, the entity identifies the specified good or service to be provided to the customer and assesses whether it controls the specified good or service before that good or service is transferred to the customer.
- IE247A A customer obtains a voucher for the restaurant that it selects. The entity does not engage the restaurants to provide meals to customers on the entity's behalf as described in the indicator in paragraph B37(a) of SFRS(I) 15. Therefore, the entity observes that the specified good or service to be provided to the customer is the right to a meal (in the form of a voucher) at a specified restaurant or restaurants, which the customer purchases and then can use itself or transfer to another person. The entity also observes that no other goods or services (other than the vouchers) are promised to the customers.
- IE247B The entity concludes that it does not control the voucher (right to a meal) at any time. In reaching this conclusion, the entity principally considers the following:
- (a) the vouchers are created only at the time that they are transferred to the customers and, thus, do not exist before that transfer. Therefore, the entity does not at any time

have the ability to direct the use of the vouchers, or obtain substantially all of the remaining benefits from the vouchers, before they are transferred to customers.

- (b) the entity neither purchases, nor commits itself to purchase, vouchers before they are sold to customers. The entity also has no responsibility to accept any returned vouchers. Therefore, the entity does not have inventory risk with respect to the vouchers as described in the indicator in paragraph B37(b) of SFRS(I) 15.

IE248 Thus, the entity concludes that it is an agent with respect to the vouchers. The entity recognises revenue in the net amount of consideration to which the entity will be entitled in exchange for arranging for the restaurants to provide vouchers to customers for the restaurants' meals, which is the 30 per cent commission it is entitled to upon the sale of each voucher.

Example 48A—Entity is a principal and an agent in the same contract

IE248A An entity sells services to assist its customers in more effectively targeting potential recruits for open job positions. The entity performs several services itself, such as interviewing candidates and performing background checks. As part of the contract with a customer, the customer agrees to obtain a licence to access a third party's database of information on potential recruits. The entity arranges for this licence with the third party, but the customer contracts directly with the database provider for the licence. The entity collects payment on behalf of the third-party database provider as part of the entity's overall invoicing to the customer. The database provider sets the price charged to the customer for the licence, and is responsible for providing technical support and credits to which the customer may be entitled for service down time or other technical issues.

IE248B To determine whether the entity is a principal or an agent, the entity identifies the specified goods or services to be provided to the customer, and assesses whether it controls those goods or services before they are transferred to the customer.

IE248C For the purpose of this example, it is assumed that the entity concludes that its recruitment services and the database access licence are each distinct on the basis of its assessment of the requirements in paragraphs 27–30 of SFRS(I) 15. Accordingly, there are two specified goods or services to be provided to the customer—access to the third party's database and recruitment services.

IE248D The entity concludes that it does not control the access to the database before it is provided to the customer. The entity does not at any time have the ability to direct the use of the licence because the customer contracts for the licence directly with the database provider. The entity does not control access to the provider's database—it cannot, for example, grant access to the database to a party other than the customer, or prevent the database provider from providing access to the customer.

IE248E As part of reaching that conclusion, the entity also considers the indicators in paragraph B37 of SFRS(I) 15. The entity concludes that these indicators provide further evidence that it does not control access to the database before that access is provided to the customer:

- (a) the entity is not responsible for fulfilling the promise to provide the database access service. The customer contracts for the licence directly with the third-party database provider and the database provider is responsible for the acceptability of the database access (for example, by providing technical support or service credits).
- (b) the entity does not have inventory risk because it does not purchase, or commit itself to purchase, the database access before the customer contracts for database access directly with the database provider.

- (c) the entity does not have discretion in setting the price for the database access with the customer because the database provider sets that price.

IE248F Thus, the entity concludes that it is an agent in relation to the third party's database service. In contrast, the entity concludes that it is the principal in relation to the recruitment services because the entity performs those services itself and no other party is involved in providing those services to the customer.

Customer options for additional goods or services

IE249 Examples 49–52 illustrate the requirements in paragraphs B39–B43 of SFRS(I) 15 on customer options for additional goods or services. Example 50 illustrates the requirements in paragraphs 27–29 of SFRS(I) 15 on identifying performance obligations. Example 52 illustrates a customer loyalty programme. That example may not apply to all customer loyalty arrangements because the terms and conditions may differ. In particular, when there are more than two parties to the arrangement, an entity should consider all facts and circumstances to determine the customer in the transaction that gives rise to the award credits.

Example 49—Option that provides the customer with a material right (discount voucher)

IE250 An entity enters into a contract for the sale of Product A for CU100. As part of the contract, the entity gives the customer a 40 per cent discount voucher for any future purchases up to CU100 in the next 30 days. The entity intends to offer a 10 per cent discount on all sales during the next 30 days as part of a seasonal promotion. The 10 per cent discount cannot be used in addition to the 40 per cent discount voucher.

IE251 Because all customers will receive a 10 per cent discount on purchases during the next 30 days, the only discount that provides the customer with a material right is the discount that is incremental to that 10 per cent (ie the additional 30 per cent discount). The entity accounts for the promise to provide the incremental discount as a performance obligation in the contract for the sale of Product A.

IE252 To estimate the stand-alone selling price of the discount voucher in accordance with paragraph B42 of SFRS(I) 15, the entity estimates an 80 per cent likelihood that a customer will redeem the voucher and that a customer will, on average, purchase CU50 of additional products. Consequently, the entity's estimated stand-alone selling price of the discount voucher is CU12 (CU50 average purchase price of additional products × 30 per cent incremental discount × 80 per cent likelihood of exercising the option). The stand-alone selling prices of Product A and the discount voucher and the resulting allocation of the CU100 transaction price are as follows:

Performance obligation	Stand-alone selling price
	CU
Product A	100
Discount voucher	12
Total	112
	Allocated transaction price
Product A	89 (CU100 ÷ CU112 × CU100)
Discount voucher	11 (CU12 ÷ CU112 × CU100)
Total	100

- IE253 The entity allocates CU89 to Product A and recognises revenue for Product A when control transfers. The entity allocates CU11 to the discount voucher and recognises revenue for the voucher when the customer redeems it for goods or services or when it expires.

Example 50—Option that does not provide the customer with a material right (additional goods or services)

- IE254 An entity in the telecommunications industry enters into a contract with a customer to provide a handset and monthly network service for two years. The network service includes up to 1,000 call minutes and 1,500 text messages each month for a fixed monthly fee. The contract specifies the price for any additional call minutes or texts that the customer may choose to purchase in any month. The prices for those services are equal to their stand-alone selling prices.
- IE255 The entity determines that the promises to provide the handset and network service are each separate performance obligations. This is because the customer can benefit from the handset and network service either on their own or together with other resources that are readily available to the customer in accordance with the criterion in paragraph 27(a) of SFRS(I) 15. In addition, the handset and network service are separately identifiable in accordance with the criterion in paragraph 27(b) of SFRS(I) 15 (on the basis of the factors in paragraph 29 of SFRS(I) 15).
- IE256 The entity determines that the option to purchase the additional call minutes and texts does not provide a material right that the customer would not receive without entering into the contract (see paragraph B41 of SFRS(I) 15). This is because the prices of the additional call minutes and texts reflect the stand-alone selling prices for those services. Because the option for additional call minutes and texts does not grant the customer a material right, the entity concludes it is not a performance obligation in the contract. Consequently, the entity does not allocate any of the transaction price to the option for additional call minutes or texts. The entity will recognise revenue for the additional call minutes or texts if and when the entity provides those services.

Example 51—Option that provides the customer with a material right (renewal option)

- IE257 An entity enters into 100 separate contracts with customers to provide one year of maintenance services for CU1,000 per contract. The terms of the contracts specify that at the end of the year, each customer has the option to renew the maintenance contract for a second year by paying an additional CU1,000. Customers who renew for a second year are also granted the option to renew for a third year for CU1,000. The entity charges significantly

higher prices for maintenance services to customers that do not sign up for the maintenance services initially (ie when the products are new). That is, the entity charges CU3,000 in Year 2 and CU5,000 in Year 3 for annual maintenance services if a customer does not initially purchase the service or allows the service to lapse.

- IE258 The entity concludes that the renewal option provides a material right to the customer that it would not receive without entering into the contract, because the price for maintenance services are significantly higher if the customer elects to purchase the services only in Year 2 or 3. Part of each customer's payment of CU1,000 in the first year is, in effect, a non-refundable prepayment of the services to be provided in a subsequent year. Consequently, the entity concludes that the promise to provide the option is a performance obligation.
- IE259 The renewal option is for a continuation of maintenance services and those services are provided in accordance with the terms of the existing contract. Instead of determining the stand-alone selling prices for the renewal options directly, the entity allocates the transaction price by determining the consideration that it expects to receive in exchange for all the services that it expects to provide, in accordance with paragraph B43 of SFRS(I) 15.
- IE260 The entity expects 90 customers to renew at the end of Year 1 (90 per cent of contracts sold) and 81 customers to renew at the end of Year 2 (90 per cent of the 90 customers that renewed at the end of Year 1 will also renew at the end of Year 2, that is 81 per cent of contracts sold).
- IE261 At contract inception, the entity determines the expected consideration for each contract is CU2,710 [CU1,000 + (90 per cent × CU1,000) + (81 per cent × CU1,000)]. The entity also determines that recognising revenue on the basis of costs incurred relative to the total expected costs depicts the transfer of services to the customer. Estimated costs for a three-year contract are as follows:

	CU
Year 1	600
Year 2	750
Year 3	1,000

- IE262 Accordingly, the pattern of revenue recognition expected at contract inception for each contract is as follows:

	Expected costs adjusted for likelihood of contract renewal	Allocation of consideration expected
	CU	CU
Year 1	600 (CU600 × 100%)	780 [(CU600 ÷ CU2,085) × CU2,710]
Year 2	675 (CU750 × 90%)	877 [(CU675 ÷ CU2,085) × CU2,710]
Year 3	810 (CU1,000 × 81%)	1,053 [(CU810 ÷ CU2,085) × CU2,710]
Total	<u>2,085</u>	<u>2,710</u>

- IE263 Consequently, at contract inception, the entity allocates to the option to renew at the end of Year 1 CU22,000 of the consideration received to date [cash of CU100,000 – revenue to be recognised in Year 1 of CU78,000 (CU780 × 100)].

- IE264 Assuming there is no change in the entity's expectations and the 90 customers renew as expected, at the end of the first year, the entity has collected cash of CU190,000 $[(100 \times \text{CU}1,000) + (90 \times \text{CU}1,000)]$, has recognised revenue of CU78,000 $(\text{CU}780 \times 100)$ and has recognised a contract liability of CU112,000.
- IE265 Consequently, upon renewal at the end of the first year, the entity allocates CU24,300 to the option to renew at the end of Year 2 [cumulative cash of CU190,000 less cumulative revenue recognised in Year 1 and to be recognised in Year 2 of CU165,700 $(\text{CU}78,000 + \text{CU}877 \times 100)$].
- IE266 If the actual number of contract renewals was different than what the entity expected, the entity would update the transaction price and the revenue recognised accordingly.

Example 52—Customer loyalty programme

- IE267 An entity has a customer loyalty programme that rewards a customer with one customer loyalty point for every CU10 of purchases. Each point is redeemable for a CU1 discount on any future purchases of the entity's products. During a reporting period, customers purchase products for CU100,000 and earn 10,000 points that are redeemable for future purchases. The consideration is fixed and the stand-alone selling price of the purchased products is CU100,000. The entity expects 9,500 points to be redeemed. The entity estimates a stand-alone selling price of CU0.95 per point (totalling CU9,500) on the basis of the likelihood of redemption in accordance with paragraph B42 of SFRS(I) 15.
- IE268 The points provide a material right to customers that they would not receive without entering into a contract. Consequently, the entity concludes that the promise to provide points to the customer is a performance obligation. The entity allocates the transaction price (CU100,000) to the product and the points on a relative stand-alone selling price basis as follows:

CU

Product	91,324	$[\text{CU}100,000 \times (\text{CU}100,000 \text{ stand-alone selling price} \div \text{CU}109,500)]$
Points	8,676	$[\text{CU}100,000 \times (\text{CU}9,500 \text{ stand-alone selling price} \div \text{CU}109,500)]$

- IE269 At the end of the first reporting period, 4,500 points have been redeemed and the entity continues to expect 9,500 points to be redeemed in total. The entity recognises revenue for the loyalty points of CU4,110 $[(4,500 \text{ points} \div 9,500 \text{ points}) \times \text{CU}8,676]$ and recognises a contract liability of CU4,566 $(\text{CU}8,676 - \text{CU}4,110)$ for the unredeemed points at the end of the first reporting period.
- IE270 At the end of the second reporting period, 8,500 points have been redeemed cumulatively. The entity updates its estimate of the points that will be redeemed and now expects that 9,700 points will be redeemed. The entity recognises revenue for the loyalty points of CU3,493 $\{[(8,500 \text{ total points redeemed} \div 9,700 \text{ total points expected to be redeemed}) \times \text{CU}8,676 \text{ initial allocation}] - \text{CU}4,110 \text{ recognised in the first reporting period}\}$. The contract liability balance is CU1,073 $(\text{CU}8,676 \text{ initial allocation} - \text{CU}7,603 \text{ of cumulative revenue recognised})$.

Non-refundable upfront fees

- IE271 Example 53 illustrates the requirements in paragraphs B48–B51 of SFRS(I) 15 on non-refundable upfront fees.

Example 53—Non-refundable upfront fee

- IE272 An entity enters into a contract with a customer for one year of transaction processing services. The entity's contracts have standard terms that are the same for all customers. The contract requires the customer to pay an upfront fee to set up the customer on the entity's systems and processes. The fee is a nominal amount and is non-refundable. The customer can renew the contract each year without paying an additional fee.
- IE273 The entity's setup activities do not transfer a good or service to the customer and, therefore, do not give rise to a performance obligation.
- IE274 The entity concludes that the renewal option does not provide a material right to the customer that it would not receive without entering into that contract (see paragraph B40 of SFRS(I) 15). The upfront fee is, in effect, an advance payment for the future transaction processing services. Consequently, the entity determines the transaction price, which includes the non-refundable upfront fee, and recognises revenue for the transaction processing services as those services are provided in accordance with paragraph B49 of SFRS(I) 15.

Licensing

- IE275 Examples 54–61 illustrate the requirements in paragraphs 22–30 of SFRS(I) 15 for identifying performance obligations and paragraphs B52–B63B of SFRS(I) 15 on licensing. These examples also illustrate other requirements as follows:
- (a) paragraphs 39–45 of SFRS(I) 15 on measuring progress towards complete satisfaction of a performance obligation (Example 58);
 - (b) paragraphs 84–86 of SFRS(I) 15 on allocating variable consideration to performance obligations (Example 57); and
 - (c) paragraph B63–B63B of SFRS(I) 15 on consideration in the form of sales-based or usage-based royalties on licences of intellectual property (Examples 57 and 61).

Example 54—Right to use intellectual property

- IE276 Using the same facts as in Case A in Example 11 (see paragraphs IE49–IE53), the entity identifies four performance obligations in a contract:
- (a) the software licence;
 - (b) installation services;
 - (c) software updates; and
 - (d) technical support.
- IE277 The entity assesses the nature of its promise to transfer the software licence in accordance with paragraph B58 of SFRS(I) 15. The entity does not consider in its assessment of the criteria in paragraph B58 of SFRS(I) 15 the promise to provide software updates, because they result in the transfer of an additional good or service to the customer (see paragraph B58(c)). The entity also observes that it does not have any contractual or implied obligations (independent of the updates and technical support) to undertake activities that will change the functionality of the software during the licence period. The entity observes that the software remains functional without the updates and the technical support and, therefore, the ability of the customer to obtain the benefits of the software is not substantially derived from, or dependent on, the entity's ongoing activities. The entity therefore determines that the contract does not require, and the customer does not reasonably expect, the entity to undertake activities that significantly affect the software (independent of the updates and

technical support). The entity concludes that the software to which the licence relates has significant stand-alone functionality and none of the criteria in paragraph B58 of SFRS(I) 15 are met. The entity further concludes that the nature of the entity's promise in transferring the licence is to provide a right to use the entity's intellectual property as it exists at a point in time. Consequently, the entity accounts for the licence as a performance obligation satisfied at a point in time.

Example 55—Licence of intellectual property

- IE278 An entity enters into a contract with a customer to licence (for a period of three years) intellectual property related to the design and production processes for a good. The contract also specifies that the customer will obtain any updates to that intellectual property for new designs or production processes that may be developed by the entity. The updates are integral to the customer's ability to derive benefit from the licence during the licence period, because the intellectual property is used in an industry in which technologies change rapidly.
- IE279 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct in accordance with paragraph 27 of SFRS(I) 15. The entity determines that the customer can benefit from (a) the licence on its own without the updates; and (b) the updates together with the initial licence. Although the benefit the customer can derive from the licence on its own (ie without the updates) is limited because the updates are integral to the customer's ability to continue to use the intellectual property in an industry in which technologies change rapidly, the licence can be used in a way that generates some economic benefits. Therefore, the criterion in paragraph 27(a) of SFRS(I) 15 is met for the licence and the updates.
- IE279A The fact that the benefit the customer can derive from the licence on its own (ie without the updates) is limited (because the updates are integral to the customer's ability to continue to use the licence in the rapidly changing technological environment) is also considered in assessing whether the criterion in paragraph 27(b) of SFRS(I) 15 is met. Because the benefit that the customer could obtain from the licence over the three-year term without the updates would be significantly limited, the entity's promises to grant the licence and to provide the expected updates are, in effect, inputs that together fulfil a single promise to deliver a combined item to the customer. That is, the nature of the entity's promise in the contract is to provide ongoing access to the entity's intellectual property related to the design and production processes for a good for the three-year term of the contract. The promises within that combined item (ie to grant the licence and to provide when-and-if-available updates) are, therefore, not separately identifiable in accordance with the criterion in paragraph 27(b) of SFRS(I) 15.
- IE280 The nature of the combined good or service that the entity promised to transfer to the customer is ongoing access to the entity's intellectual property related to the design and production processes for a good for the three-year term of the contract. On the basis of this conclusion, the entity applies paragraphs 31–38 of SFRS(I) 15 to determine whether the single performance obligation is satisfied at a point in time or over time. The entity concludes that because the customer simultaneously receives and consumes the benefits of the entity's performance as it occurs, the performance obligation is satisfied over time in accordance with paragraph 35(a) of SFRS(I) 15.

Example 56—Identifying a distinct licence

- IE281 An entity, a pharmaceutical company, licenses to a customer its patent rights to an approved drug compound for 10 years and also promises to manufacture the drug for the customer. The drug is a mature product; therefore the entity will not undertake any activities to support the drug, which is consistent with its customary business practices.

Case A—Licence is not distinct

- IE282 In this case, no other entity can manufacture this drug because of the highly specialised nature of the manufacturing process. As a result, the licence cannot be purchased separately from the manufacturing services.
- IE283 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct in accordance with paragraph 27 of SFRS(I) 15. The entity determines that the customer cannot benefit from the licence without the manufacturing service; therefore, the criterion in paragraph 27(a) of SFRS(I) 15 is not met. Consequently, the licence and the manufacturing service are not distinct and the entity accounts for the licence and the manufacturing service as a single performance obligation.
- IE284 The entity applies paragraphs 31–38 of SFRS(I) 15 to determine whether the performance obligation (ie the bundle of the licence and the manufacturing services) is a performance obligation satisfied at a point in time or over time.

Case B—Licence is distinct

- IE285 In this case, the manufacturing process used to produce the drug is not unique or specialised and several other entities can also manufacture the drug for the customer.
- IE286 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct, and it concludes that the criteria in paragraph 27 of SFRS(I) 15 are met for each of the licence and the manufacturing service. The entity concludes that the criterion in paragraph 27(a) of SFRS(I) 15 is met because the customer can benefit from the licence together with readily available resources other than the entity's manufacturing service (because there are other entities that can provide the manufacturing service), and can benefit from the manufacturing service together with the licence transferred to the customer at the start of the contract.
- IE286A The entity also concludes that its promises to grant the licence and to provide the manufacturing service are separately identifiable (ie the criterion in paragraph 27(b) of SFRS(I) 15 is met). The entity concludes that the licence and the manufacturing service are not inputs to a combined item in this contract on the basis of the principle and the factors in paragraph 29 of SFRS(I) 15. In reaching this conclusion, the entity considers that the customer could separately purchase the licence without significantly affecting its ability to benefit from the licence. Neither the licence, nor the manufacturing service, is significantly modified or customised by the other and the entity is not providing a significant service of integrating those items into a combined output. The entity further considers that the licence and the manufacturing service are not highly interdependent or highly interrelated because the entity would be able to fulfil its promise to transfer the licence independently of fulfilling its promise to subsequently manufacture the drug for the customer. Similarly, the entity would be able to manufacture the drug for the customer even if the customer had previously obtained the licence and initially utilised a different manufacturer. Thus, although the manufacturing service necessarily depends on the licence in this contract (ie the entity would not provide the manufacturing service without the customer having obtained the licence), the licence and the manufacturing service do not significantly affect each other. Consequently, the entity concludes that its promises to grant the licence and to provide the manufacturing service are distinct and that there are two performance obligations:
- (a) licence of patent rights; and
 - (b) manufacturing service.
- IE287 The entity assesses, in accordance with paragraph B58 of SFRS(I) 15, the nature of the entity's promise to grant the licence. The drug is a mature product (ie it has been approved, is currently being manufactured and has been sold commercially for the last several years). For these types of mature products, the entity's customary business practices are not to undertake any activities to support the drug. The drug compound has significant stand-alone

functionality (ie its ability to produce a drug that treats a disease or condition). Consequently, the customer obtains a substantial portion of the benefits of the drug compound from that functionality, rather than from the entity's ongoing activities. The entity concludes that the criteria in paragraph B58 of SFRS(I) 15 are not met because the contract does not require, and the customer does not reasonably expect, the entity to undertake activities that significantly affect the intellectual property to which the customer has rights. In its assessment of the criteria in paragraph B58 of SFRS(I) 15, the entity does not take into consideration the separate performance obligation of promising to provide a manufacturing service. Consequently, the nature of the entity's promise in transferring the licence is to provide a right to use the entity's intellectual property in the form and the functionality with which it exists at the point in time that it is granted to the customer. Consequently, the entity accounts for the licence as a performance obligation satisfied at a point in time.

- IE288 The entity applies paragraphs 31–38 of SFRS(I) 15 to determine whether the manufacturing service is a performance obligation satisfied at a point in time or over time.

Example 57—Franchise rights

- IE289 An entity enters into a contract with a customer and promises to grant a franchise licence that provides the customer with the right to use the entity's trade name and sell the entity's products for 10 years. In addition to the licence, the entity also promises to provide the equipment necessary to operate a franchise store. In exchange for granting the licence, the entity receives a sales-based royalty of five per cent of the customer's monthly sales. The fixed consideration for the equipment is CU150,000 payable when the equipment is delivered.

Identifying performance obligations

- IE290 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct in accordance with paragraph 27 of SFRS(I) 15. The entity observes that the entity, as a franchisor, has developed a customary business practice to undertake activities such as analysing consumers' changing preferences and implementing product improvements, pricing strategies, marketing campaigns and operational efficiencies to support the franchise name. However, the entity concludes that these activities do not directly transfer goods or services to the customer because they are part of the entity's promise to grant a licence.
- IE291 The entity determines that it has two promises to transfer goods or services: a promise to grant a licence and a promise to transfer equipment. In addition, the entity concludes that the promise to grant the licence and the promise to transfer the equipment are each distinct. This is because the customer can benefit from each good or service (ie the licence and the equipment) on its own or together with other resources that are readily available (see paragraph 27(a) of SFRS(I) 15). The customer can benefit from the licence together with the equipment that is delivered before the opening of the franchise and the equipment can be used in the franchise or sold for an amount other than scrap value. The entity also determines that the promises to grant the franchise licence and to transfer the equipment are separately identifiable, in accordance with the criterion in paragraph 27(b) of SFRS(I) 15. The entity concludes that the licence and the equipment are not inputs to a combined item (ie they are not fulfilling what is, in effect, a single promise to the customer). In reaching this conclusion, the entity considers that it is not providing a significant service of integrating the licence and the equipment into a combined item (ie the licensed intellectual property is not a component of, and does not significantly modify, the equipment). In addition, the licence and the equipment are not highly interdependent or highly interrelated because the entity would be able to fulfil each promise (ie to license the franchise or to transfer the equipment) independently of the other. Consequently, the entity has two performance obligations:

- (a) the franchise licence; and
- (b) the equipment.

Allocating the transaction price

- IE292 The entity determines that the transaction price includes fixed consideration of CU150,000 and variable consideration (five per cent of customer sales). The stand-alone selling price of the equipment is CU150,000 and the entity regularly licenses franchises in exchange for five per cent of customer sales.
- IE293 The entity applies paragraph 85 of SFRS(I) 15 to determine whether the variable consideration should be allocated entirely to the performance obligation to transfer the franchise licence. The entity concludes that the variable consideration (ie the sales-based royalty) should be allocated entirely to the franchise licence because the variable consideration relates entirely to the entity's promise to grant the franchise licence. In addition, the entity observes that allocating CU150,000 to the equipment and the sales-based royalty to the franchise licence would be consistent with an allocation based on the entity's relative stand-alone selling prices in similar contracts. Consequently, the entity concludes that the variable consideration (ie the sales-based royalty) should be allocated entirely to the performance obligation to grant the franchise licence.

Application guidance: licensing

- IE294 The entity assesses, in accordance with paragraph B58 of SFRS(I) 15, the nature of the entity's promise to grant the franchise licence. The entity concludes that the criteria in paragraph B58 of SFRS(I) 15 are met and the nature of the entity's promise is to provide access to the entity's intellectual property in its current form throughout the licence period. This is because:
- (a) the entity concludes that the customer would reasonably expect that the entity will undertake activities that will significantly affect the intellectual property to which the customer has rights. The ability of the customer to obtain benefit from the intellectual property to which the customer has rights is substantially derived from, or dependent upon, the expected activities of the entity. This is on the basis of the entity's customary business practice to undertake activities such as analysing consumers' changing preferences and implementing product improvements, pricing strategies, marketing campaigns and operational efficiencies. In addition, the entity observes that because part of its compensation is dependent on the success of the franchisee (as evidenced through the sales-based royalty), the entity has a shared economic interest with the customer that indicates that the customer will expect the entity to undertake those activities to maximise earnings.
 - (b) the entity also observes that the franchise licence requires the customer to implement any changes that result from those activities and thus exposes the customer to any positive or negative effects of those activities.
 - (c) the entity also observes that even though the customer may benefit from the activities through the rights granted by the licence, they do not transfer a good or service to the customer as those activities occur.
- IE295 Because the criteria in paragraph B58 of SFRS(I) 15 are met, the entity concludes that the promise to transfer the licence is a performance obligation satisfied over time in accordance with paragraph 35(a) of SFRS(I) 15.
- IE296 The entity also concludes that because the consideration that is in the form of a sales-based royalty relates specifically to the franchise licence (see paragraph B63A), the entity applies paragraph B63 of SFRS(I) 15. After the transfer of the franchise licence, the entity recognises revenue as and when the customer's sales occur because the entity concludes that this reasonably depicts the entity's progress towards complete satisfaction of the franchise licence performance obligation.

Example 58—Access to intellectual property

- IE297 An entity, a creator of comic strips, licenses the use of the images and names of its comic strip characters in three of its comic strips to a customer for a four-year term. There are main characters involved in each of the comic strips. However, newly created characters appear regularly and the images of the characters evolve over time. The customer, an operator of cruise ships, can use the entity's characters in various ways, such as in shows or parades, within reasonable guidelines. The contract requires the customer to use the latest images of the characters.
- IE298 In exchange for granting the licence, the entity receives a fixed payment of CU1 million in each year of the four-year term.
- IE299 In accordance with paragraph 27 of SFRS(I) 15, the entity assesses the goods and services promised to the customer to determine which goods and services are distinct. The entity concludes that it has no other performance obligations other than the promise to grant a licence. That is, the additional activities associated with the licence do not directly transfer a good or service to the customer because they are part of the entity's promise to grant a licence.
- IE300 The entity assesses the nature of the entity's promise to transfer the licence in accordance with paragraph B58 of SFRS(I) 15. In assessing the criteria the entity considers the following:
- (a) the customer reasonably expects (arising from the entity's customary business practices) that the entity will undertake activities that will significantly affect the intellectual property to which the customer has rights (ie the characters). This is because the entity's activities (ie development of the characters) change the form of the intellectual property to which the customer has rights. In addition, the ability of the customer to obtain benefit from the intellectual property to which the customer has rights is substantially derived from, or dependent upon, the entity's ongoing activities (ie the publishing of the comic strip).
 - (b) the rights granted by the licence directly expose the customer to any positive or negative effects of the entity's activities because the contract requires the customer to use the latest characters.
 - (c) even though the customer may benefit from those activities through the rights granted by the licence, they do not transfer a good or service to the customer as those activities occur.
- IE301 Consequently, the entity concludes that the criteria in paragraph B58 of SFRS(I) 15 are met and that the nature of the entity's promise to transfer the licence is to provide the customer with access to the entity's intellectual property as it exists throughout the licence period. Consequently, the entity accounts for the promised licence as a performance obligation satisfied over time (ie the criterion in paragraph 35(a) of SFRS(I) 15 is met).
- IE302 The entity applies paragraphs 39–45 of SFRS(I) 15 to identify the method that best depicts its performance in the licence. Because the contract provides the customer with unlimited use of the licensed characters for a fixed term, the entity determines that a time-based method would be the most appropriate measure of progress towards complete satisfaction of the performance obligation.

Example 59—Right to use intellectual property

- IE303 An entity, a music record label, licenses to a customer a 1975 recording of a classical symphony by a noted orchestra. The customer, a consumer products company, has the right to use the recorded symphony in all commercials, including television, radio and online advertisements for two years in Country A. In exchange for providing the licence, the entity

receives fixed consideration of CU10,000 per month. The contract does not include any other goods or services to be provided by the entity. The contract is non-cancellable.

- IE304 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct in accordance with paragraph 27 of SFRS(I) 15. The entity concludes that its only performance obligation is to grant the licence. The entity determines that the term of the licence (two years), its geographical scope (the customer's right to use the recording only in Country A), and the defined permitted use for the recording (in commercials) are all attributes of the promised licence in the contract.
- IE305 In accordance with paragraph B58 of SFRS(I) 15, the entity assesses the nature of the entity's promise to grant the licence. The entity does not have any contractual or implied obligations to change the licensed recording. The licensed recording has significant stand-alone functionality (ie the ability to be played) and, therefore, the ability of the customer to obtain the benefits of the recording is not substantially derived from the entity's ongoing activities. The entity therefore determines that the contract does not require, and the customer does not reasonably expect, the entity to undertake activities that significantly affect the licensed recording (ie the criterion in paragraph B58(a) is not met). Consequently, the entity concludes that the nature of its promise in transferring the licence is to provide the customer with a right to use the entity's intellectual property as it exists at the point in time that it is granted. Therefore, the promise to grant the licence is a performance obligation satisfied at a point in time. The entity recognises all of the revenue at the point in time when the customer can direct the use of, and obtain substantially all of the remaining benefits from, the licensed intellectual property.
- IE306 Because of the length of time between the entity's performance (at the beginning of the period) and the customer's monthly payments over two years (which are non-cancellable), the entity considers the requirements in paragraphs 60–65 of SFRS(I) 15 to determine whether a significant financing component exists.

Example 60—Sales-based royalty for a licence of intellectual property

- IE307 An entity, a movie distribution company, licenses Movie XYZ to a customer. The customer, an operator of cinemas, has the right to show the movie in its cinemas for six weeks. Additionally, the entity has agreed to (a) provide memorabilia from the filming to the customer for display at the customer's cinemas before the beginning of the six-week screening period; and (b) sponsor radio advertisements for Movie XYZ on popular radio stations in the customer's geographical area throughout the six-week screening period. In exchange for providing the licence and the additional promotional goods and services, the entity will receive a portion of the operator's ticket sales for Movie XYZ (ie variable consideration in the form of a sales-based royalty).
- IE308 The entity concludes that the licence to show Movie XYZ is the predominant item to which the sales-based royalty relates because the entity has a reasonable expectation that the customer would ascribe significantly more value to the licence than to the related promotional goods or services. The entity recognises revenue from the sales-based royalty, the only consideration to which the entity is entitled under the contract, wholly in accordance with paragraph B63. If the licence, the memorabilia and the advertising activities are separate performance obligations, the entity would allocate the sales-based royalty to each performance obligation.

Example 61—Access to intellectual property

- IE309 An entity, a well-known sports team, licenses the use of its name and logo to a customer. The customer, an apparel designer, has the right to use the sports team's name and logo on items including t-shirts, caps, mugs and towels for one year. In exchange for providing the licence, the entity will receive fixed consideration of CU2 million and a royalty of five per cent

of the sales price of any items using the team name or logo. The customer expects that the entity will continue to play games and provide a competitive team.

- IE310 The entity assesses the goods and services promised to the customer to determine which goods and services are distinct in accordance with paragraph 27 of SFRS(I) 15. The entity concludes that its only performance obligation is to transfer the licence. The additional activities associated with the licence (ie continuing to play games and provide a competitive team) do not directly transfer a good or service to the customer because they are part of the entity's promise to grant the licence.
- IE311 The entity assesses the nature of the entity's promise to transfer the licence in accordance with paragraph B58 of SFRS(I) 15. In assessing the criteria the entity considers the following:
- (a) the entity concludes that the customer would reasonably expect that the entity will undertake activities that will significantly affect the intellectual property (ie the team name and logo) to which the customer has rights. This is on the basis of the entity's customary business practice to undertake activities that support and maintain the value of the name and logo such as continuing to play and providing a competitive team. The entity determines that the ability of the customer to obtain benefit from the name and logo is substantially derived from, or dependent upon, the expected activities of the entity. In addition, the entity observes that because some of its consideration is dependent on the success of the customer (through the sales-based royalty), the entity has a shared economic interest with the customer, which indicates that the customer will expect the entity to undertake those activities to maximise earnings.
 - (b) the entity observes that the rights granted by the licence (ie the use of the team's name and logo) directly expose the customer to any positive or negative effects of the entity's activities.
 - (c) the entity also observes that even though the customer may benefit from the activities through the rights granted by the licence, they do not transfer a good or service to the customer as those activities occur.
- IE312 The entity concludes that the criteria in paragraph B58 of SFRS(I) 15 are met and the nature of the entity's promise to grant the licence is to provide the customer with access to the entity's intellectual property as it exists throughout the licence period. Consequently, the entity accounts for the promised licence as a performance obligation satisfied over time (ie the criterion in paragraph 35(a) of SFRS(I) 15 is met).
- IE313 The entity then applies paragraphs 39–45 of SFRS(I) 15 to determine a measure of progress that will depict the entity's performance. For the consideration that is in the form of a sales-based royalty, paragraph B63 of SFRS(I) 15 applies because the sales-based royalty relates solely to the licence, which is the only performance obligation in the contract. The entity concludes that recognition of the CU2 million fixed consideration as revenue rateably over time plus recognition of the royalty as revenue as and when the customer's sales of items using the team name or logo occur reasonably depicts the entity's progress towards complete satisfaction of the licence performance obligation.

Repurchase agreements

- IE314 Example 62 illustrates the requirements in paragraphs B64–B76 of SFRS(I) 15 on repurchase agreements.

Example 62—Repurchase agreements

IE315 An entity enters into a contract with a customer for the sale of a tangible asset on 1 January 20X7 for CU1 million.

Case A—Call option: financing

IE316 The contract includes a call option that gives the entity the right to repurchase the asset for CU1.1 million on or before 31 December 20X7.

IE317 Control of the asset does not transfer to the customer on 1 January 20X7 because the entity has a right to repurchase the asset and therefore the customer is limited in its ability to direct the use of, and obtain substantially all of the remaining benefits from, the asset. Consequently, in accordance with paragraph B66(b) of SFRS(I) 15, the entity accounts for the transaction as a financing arrangement, because the exercise price is more than the original selling price. In accordance with paragraph B68 of SFRS(I) 15, the entity does not derecognise the asset and instead recognises the cash received as a financial liability. The entity also recognises interest expense for the difference between the exercise price (CU1.1 million) and the cash received (CU1 million), which increases the liability.

IE318 On 31 December 20X7, the option lapses unexercised; therefore, the entity derecognises the liability and recognises revenue of CU1.1 million.

Case B—Put option: lease

IE319 Instead of having a call option, the contract includes a put option that obliges the entity to repurchase the asset at the customer's request for CU900,000 on or before 31 December 20X7. The market value is expected to be CU750,000 on 31 December 20X7.

IE320 At the inception of the contract, the entity assesses whether the customer has a significant economic incentive to exercise the put option, to determine the accounting for the transfer of the asset (see paragraphs B70–B76 of SFRS(I) 15). The entity concludes that the customer has a significant economic incentive to exercise the put option because the repurchase price significantly exceeds the expected market value of the asset at the date of repurchase. The entity determines there are no other relevant factors to consider when assessing whether the customer has a significant economic incentive to exercise the put option. Consequently, the entity concludes that control of the asset does not transfer to the customer, because the customer is limited in its ability to direct the use of, and obtain substantially all of the remaining benefits from, the asset.

IE321 In accordance with paragraphs B70–B71 of SFRS(I) 15, the entity accounts for the transaction as a lease in accordance with SFRS(I) 16 *Leases*.

Bill-and-hold arrangements

IE322 Example 63 illustrates the requirements in paragraphs B79–B82 of SFRS(I) 15 on bill-and-hold arrangements.

Example 63—Bill-and-hold arrangement

IE323 An entity enters into a contract with a customer on 1 January 20X8 for the sale of a machine and spare parts. The manufacturing lead time for the machine and spare parts is two years.

IE324 Upon completion of manufacturing, the entity demonstrates that the machine and spare parts meet the agreed-upon specifications in the contract. The promises to transfer the machine and spare parts are distinct and result in two performance obligations that each will be satisfied at a point in time. On 31 December 20X9, the customer pays for the machine and spare parts, but only takes physical possession of the machine. Although the customer inspects and accepts the spare parts, the customer requests that the spare parts be stored at

the entity's warehouse because of its close proximity to the customer's factory. The customer has legal title to the spare parts and the parts can be identified as belonging to the customer. Furthermore, the entity stores the spare parts in a separate section of its warehouse and the parts are ready for immediate shipment at the customer's request. The entity expects to hold the spare parts for two to four years and the entity does not have the ability to use the spare parts or direct them to another customer.

- IE325 The entity identifies the promise to provide custodial services as a performance obligation because it is a service provided to the customer and it is distinct from the machine and spare parts. Consequently, the entity accounts for three performance obligations in the contract (the promises to provide the machine, the spare parts and the custodial services). The transaction price is allocated to the three performance obligations and revenue is recognised when (or as) control transfers to the customer.
- IE326 Control of the machine transfers to the customer on 31 December 20X9 when the customer takes physical possession. The entity assesses the indicators in paragraph 38 of SFRS(I) 15 to determine the point in time at which control of the spare parts transfers to the customer, noting that the entity has received payment, the customer has legal title to the spare parts and the customer has inspected and accepted the spare parts. In addition, the entity concludes that all of the criteria in paragraph B81 of SFRS(I) 15 are met, which is necessary for the entity to recognise revenue in a bill-and-hold arrangement. The entity recognises revenue for the spare parts on 31 December 20X9 when control transfers to the customer.
- IE327 The performance obligation to provide custodial services is satisfied over time as the services are provided. The entity considers whether the payment terms include a significant financing component in accordance with paragraphs 60–65 of SFRS(I) 15.
